# 酒店管理系统设计与实现

## 摘 要

在当今信息高度发达，酒店业的各个方面不再只是传统的酒店管理业务，但为行业提供一个更广泛，更全面的服务。中档经济型酒店和一系列营销等服务，计划开始客房供客人住宿，直到最后查出来，整个过程应该实现为客户提供在游客中心快速，便捷的服务，让客人觉得作为一个面向客户享受到更好的管理和简化复杂的操作，最完善的酒店业务规范操作时间很短，让客人感到舒适和难忘。因此，引入新的管理信息系统将是的管理的一部分，为了提高效率，提高设施水平。为了满足视觉系统客户的需求，个人的主要功能包括系统，计费组，客户的现金，预订，销售查询，客户管理，网络设置，系统设置，等停留用户的这样，等待的时间会减少显著，操作注册用户可以轻松地管理信息和客房状态，使有效的功能和精确管理体系。

## ABSTRACT

Nowadays, with highly developed information, the various working links involved in hotel business are no longer just traditional accommodation and settlement business, but broader and more comprehensive service industry representatives. Hotels and hotels as a service industry, from room marketing, that is, the reservation of guests, to check-in and check-out, the whole process should be able to reflect the customer-centered, provide fast and convenient services, give guests a customer-first enjoyment, improve management level, and simplify various complex operations. In order to make passengers comfortable and unforgettable, we should complete the standard operation of hotel business in the shortest time. Therefore, the use of a new computer management system will become one of the means to improve hotel management efficiency and service level. The system realizes the basic process of hotel management from the perspective of meeting the needs of customers. The main functions of the system include individual billing, group billing, guest checkout, room reservation, business inquiry, customer management, network settings, system settings and so on. The waiting time will be greatly reduced when the user stays in the hotel. The operator can easily register the user information and manage the room status, thus realizing the efficient and accurate characteristics of the hotel management system.

# 目 录

1 绪论 .....	1
1.1 研究背景 .....	1
1.2 研究意义 .....	1
1.3 课题研究现状 .....	2
1.4 系统开发关键技术与开发环境 .....	3
1.4.1 Java 简介 .....	3
1.4.2 JDBC .....	3
1.5 研究内容 .....	4
2 系统需求分析 .....	5
2.1 需求分析 .....	5
2.2 可行性分析 .....	5
2.3 系统功能需求分析 .....	6
2.4 系统数据需求分析 .....	7
3 系统总体设计 .....	9
3.1 系统设计 .....	9
3.2 数据库设计 .....	10
3.2.1 数据库概念设计 .....	10
3.2.2 数据库逻辑设计 .....	11
4 详细的系统设计和实施 .....	16
4.1 功能需求与程序模块的关系 .....	16
4.2 实施主要功能 .....	16
4.2.1 系统登录界面 .....	16
4.2.2 系统主界面 .....	17
4.2.3 散客开单 .....	18
4.2.4 团体开单 .....	19
4.2.5 旅客续住 .....	20
