identify是什么意思呢？猜一猜。

identify (v.)

认为与...一样

1640s, "regard as the same," from French *identifier*, from *identité* (see **identity**). Sense of "determine the identity of, recognize as or prove to be the same" first recorded 1769. Meaning "make one (with), associate (oneself), regard oneself as being the essence of" is from 1780. Sense of "identification" is attested by 1886. Related: *Identified*; *identifying*.

认出；识别；
确认...

identity (n.)

一样

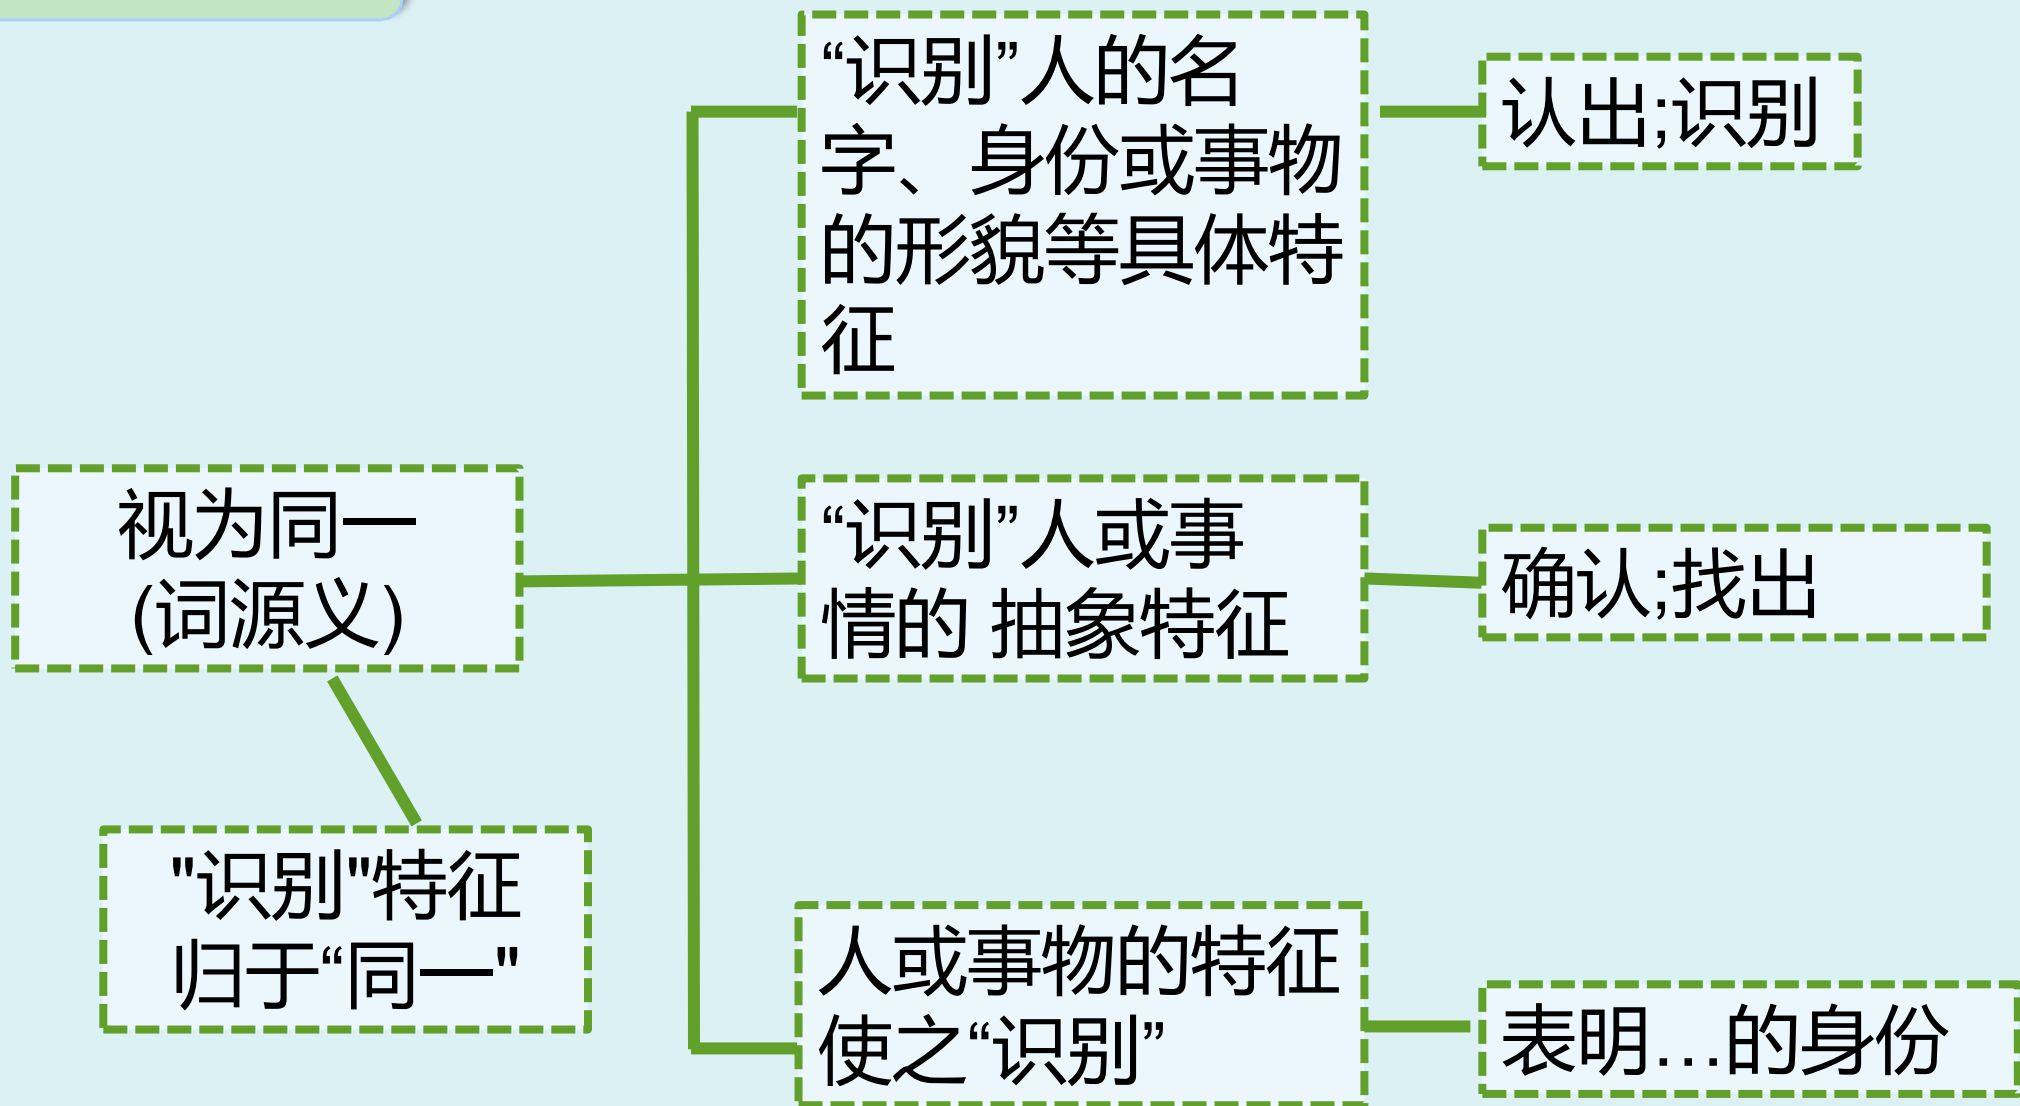

c. 1600, "sameness, oneness, state of being the same," from Middle French *identité* (14c.), from Medieval Latin *identitatem* (nominative *identitas*) "sameness," ultimately from Latin *idem* (neuter) "the same" (see **idem**). [For discussion of Latin formation, see entry in OED.] Earlier form of the word in English was *idemptitie* (1560s), from Medieval Latin *idemptitas*. Term *identity crisis* first recorded 1954. *Identity theft* attested from 1995.

identify常用义是“**认出；识别；找出；确认**”，与它的词源义“认为...相同”相去甚远。但是词块**identify with**意思是“**与...相同**”，来源于它的词源义。
