

# 浅析城市园林工程成本管理问题

## 摘要

园林工程作为当前市政建设的热点,基于一定工程目标之下的成本控制管理工作是有利于为施工方创造实在的经济收益的,但成本控制管理工作的实施需要结合项目自身属性和特点来进行科学化的规划与实施。施工主体自然更为关注工程成本,但是如何通过科学化的手段来降低项目过程中所损耗的成本是企业管理者更应该重视的。因此把握园林工程施工安全、质量管理、人员管理、费用管理等对工程成本的具体影响有利于施工主体尽可能道地降低施工成本来获取更大收益。探究园林绿化工程之中所产生的问题和原因与工程成本之间的关系在工程管理维度上有着较强的理论意义,这种探讨虽服务于现实但能够综合各类工程管理理论与经验的长处,使之获得更为有效的理论解释则是本文的理论意义。本文的结构较为明确,导入部分介绍了全文的研究背景、意义及主要思路与方法,是全文的起点,它为接下来的研究设定了目标。文献回顾则通过爬梳前人的研究成果为全文提供理论框架和学术经验,回溯国内国外学者对影响工程成本因素的各项的研究成果将有益于全文学术深度的提升。成本管理研究板块则从成本构成要素分析和工程管理两个方面展开论述,分析园林工程的实际成本影响因素。过程管理是工程管理的重要维度,该部分从行业现状、人才问题及项目各类影响成本的过程性因素着手分析行业问题,为提出相应措施提供基本依据。最后,全文从引入专业人才、成本管控体系的优化、施工安全建设阶段成本控制和质量管理与养护的成本优化等方面阐述控制工程成本的建议,以体系化的对策服务于园林工程管理现实。

**关键词:** 园林工程, 工程管理, 成本控制, 解决对策

# **On the influence of construction safety and quality management of landscape engineering on project cost**

## **Abstract**

As the hot spot of the current municipal construction, the cost saving based on a certain project goal is conducive to create real economic benefits for the construction party, but it must be based on the strict control of construction safety and quality management. The construction subject naturally pays more attention to the engineering cost, but according to the national laws and regulations and the social responsibility morality of the enterprise, the construction safety and the quality management can not be ignored. To explore the balance relationship between the three, and grasp the specific influence of the construction safety and the quality management of the garden Engineering on the engineering cost is conducive to the construction subject to reduce the construction cost as much as possible and obtain greater benefits. It has a strong theoretical significance to explore the relationship between construction safety, quality management and engineering cost in the dimension of engineering management. Although this discussion serves the reality, it can integrate the advantages of various engineering management theories and experience, and make it obtain more effective theoretical explanation. The structure of this paper is relatively clear. The introduction part introduces the research background, significance, main ideas and methods of the full text. It is the starting point of the full text and sets the goal for the next research. Literature review provides the theoretical framework and academic experience for the full text by combing the previous research results, and it will be beneficial to the academic depth of the full text by recalling the focus of domestic and foreign scholars on construction safety,
