文章大意: 本文主要介绍了我们都有表达创造力的能力, 通往创造性生产力的道路是愿意做一些不同的事情。

Some people think creativity is making something completely new, so they do not think of themselves as creative ones. However, some other people think creativity can just be expressing themselves through everyday acts and they are born creative because it is not an all-or-nothing quality or skill.

Whether or not we realize it, we all have the ability to express creativity. Sometimes the path to creative productivity is being willing to do something different.

Are you someone who loves to read comics? Perhaps it is time you create one of your own.

Don' t worry if you cannot draw very well or feel that you cannot write humorous reports for characters. Nobody says this is an exam! You only have to please yourself, to gain the satisfaction that you try something new, all on your own. If you feel easy, you can of course share it with our loved ones, or post it on social media,
