

学生成绩管理系统的设计与分析

摘 要

本文主要是学生成绩管理系统的设计与分析展开的一系列信息化水平进行的一个调查而设计出一套管理系统。

首先讲述了论文的发展和研究现状与开发环境和工具。其次，给出了系统管理体系的需求调查和概述，主要内容包含了对系统进行了一个详细调查，用户实际需求情况的调查，系统设计的可行性展开了调查分析。用户的需求主要是对用户对系统的要求进行了描述，并给出了系统工作顺序的流程图。而后，给出了系统的总体计划，包括了系统的设计目的、功能模块、数据库、部分编码的设计。在模块的设计中，并给出了部分的功能流程图。主要是采用 E-R 图，数据库表来进行设计构造的。在论文的最后，给出了结论。

关键词：成绩管理系统；需求分析；软件设计

ABSTRACT

This paper is mainly about the design and analysis of student achievement management system, a set of management system designed by a series of surveys on the level of informatization.

Firstly, it describes the development and research status of the paper and the development environment and tools. Secondly, the demand survey and overview of the system management system are given. The main contents include a detailed survey of the system, a survey of the actual needs of users, and a survey of the feasibility of the system design. The main requirement of users is to describe the system requirements of users, and give the flow chart of the system's working order. Then, the overall plan of the system is given, including the design purpose of the system, functional modules, database and part of the coding design. In the design of the module, the flow chart of some functions is given. Mainly using E-R chart, database table to design and construct. At the end of the paper, the conclusion is given.

Key words: Achievement Management System; Demand Analysis; Software Design
