## 摘 要

在网络社交日益成熟的发展中，人们不再满足于网络平台只是社交软件，而是更多的应运在生活中，如旅游、购物、学习等。近年来，在微信这个软件中，微信小程序脱颖而出，它是一种连接用户与服务的全新方式，并具有优秀的用户体验。

本文梳理了在移动互联网的作用下，微信小程序简单高效的应运开发框架的特点，使用微信平台开发的校园社交平台——二手交易市场。二手交易市场是保证以购买或者出售高校学生的闲暇物品为基础的微信平台交易的体系<sup>[1]</sup>。在微信小程序的开发模式下，本站实现了前后台分离，满足了两类用户的需求，分别是用户和系统管理员，主要实现了用户的登录、根据商品分类的查找、在需求专区的发布和查找、发布内容等。采用了 JavaScript、Java 等编程语言实现了二手交易市场的客户端，满足了高校学生的需求，并且营造了创新思想和勤俭节约的良好习惯。

## ABSTRACT

In the increasingly mature development of online social interaction, People are no longer satisfied with network platforms but only social software. However, more and more people come into life, such as traveling, shopping, studying etc. In recent years, WeChat applet stands out, It is a brand-new way to connect users and services, And has excellent use experience.

Under the action of mobile Internet, The WeChat applet has the characteristics of simple and efficient development framework. The second-hand trading market, a campus social platform developed using WeChat platform. The second-hand trading market is a system that guarantees WeChat platform transactions based on the purchase or sale of leisure goods for college students. Under the development mode of WeChat applet, This site has realized the separation of the front and the back. Meet the needs of two types of users, They are users and system administrators respectively. It mainly realizes user login, search according to commodity classification, release and search in the demand area, orders and shopping carts, etc. Using JavaScript, Java and other programming languages to realize the second-hand trading market client, It meets the needs of college students and builds up a good habit of innovation and thrift.

**Key words:** Wechat; Used goods; Small programs; Java
