Many teenagers feel that the most important people in their lives

are their friends . They believe that their family members don't know

them as well as their friends do . In large families . it is quite often for

brothers and sisters to fight with each other and then they can only go

to their friends for ideas . It is very important for teenagers to have one

good friend or a group of friends . Even when they are not with their

friends , they usually spend a lot of time talking among themselves on

the phone . This communication ( 交流 ) is very important in children's

growing up , because friends can discuss something . These things are

difficult to say to their family members .
