The Warmer Days of Spring

Remember how the sun feels on the first warm day of spring?

In spring, each day grows longer and warmer.

The plants and animals feel it grow warmer, too.

The Garden

The flowers send up **shoots**
from round white **bulbs**.

Soon the garden will be filled
with color.

The robins are back at work.
They collect brown grass for a nest.
Soon they will feed **wiggly** worms
to hungry babies.

The Woods

The trees are growing again.

The fat **buds** on a tree grow into
big, flat leaves.

Caterpillars nibble on them.
