#### 先看一常见的现象

两个问题:1、儿子的色盲基因哪里来的? 2、母亲将色盲基因遗传给了儿子后,

病好了吗?说明什么问题?

And the world was a supply that the world with the world was the world with the world with the world was the world with the world with the world was the world with the world was the world with the world with the world was the world with the world

## 第三节 遗传信息的传递

遗传信息的传递

DNA的复制

细胞分裂

# DNA的复制

解决二个问题:

携带的遗传信息不变

### DNA复制的推测市

还是?

怎么研究呢?

## 同位素示踪法:

- West of the state of the stat

密度梯度离心法:用超离心机对分子物质溶液,长时间加一个离心力场达到沉降平衡,在沉降池内从液面到底部出现一定的密度梯度。即:在一定离心力下把颗粒分配到梯度中某些特定位置上,形成不同区带的分离方法。)
