This story is excerpted from the read-aloud books included in the Bridges in Mathematics Pre-K curriculum. This math-rich collection features theme-based counting and numeral recognition, sequencing, shapes and locations, and very early addition and subtraction. For more information about these books, including how to order the full printed collection of nine titles, visit store.mathlearningcenter.org/bridges-2nd-edition/2bpkread.asp.

The Math Learning Center is a nonprofit organization serving the education community. Our mission is to inspire and enable individuals to discover and develop their mathematical confidence and ability. We offer innovative and standards-based professional development, curriculum, materials, and resources to support learning and teaching. To find out more, visit us at www.mathlearningcenter.org.

BB'S BOT SHOP

Story by Allyn Fisher
Art by Amber Cooper

Becca and her friend Brian both loved robots.

Robots are the best!
They come in all different
sizes, shapes, and colors.

Some robots look like people,
and some look like animals.
There are robot spiders, robot fish,

**When they weren't talking about robots,
they were reading about them.**

Sometimes, they even dreamed about robots!

They loved robots so much they decided to build their own robot shop.

We can make robots and sell them for a dollar. That way, lots of ... can ...

Let's call it BB's Bot Shop. That's B for Becca, B for Brian, and Bot for robot!

**On Monday, the shop was finished.
Now it was time to start making robots.**

On Tuesday, Becca and Brian checked their supply of shapes to see if they had everything they needed to make the robots.
