

宠物寄存管理系统的设计与实现

[摘要] 随着生活水平的提高，工作压力随着变大，人们会通过养宠物来舒缓压力，宠物可以带来很多快乐，弥补社交需求的不足，丁克家庭和中老年人群也会选择动物伴侣来填补感情的空缺。当然饲养宠物之后存在的问题是主人不可能每时每刻都陪伴在自己的爱宠身边，当主人需要出差、旅行或者其他事情的时候，宠物也需要主人的陪伴，这个时候就需要一个平台寄存宠物。当前现代科技逐渐发达，人们生活离不开互联网，而面对面的交流和交易已经变得不是那么方便，在网络上进行交流和交易是大多数人的选择，顺应时代的发展，建立一个宠物寄存管理系统。

实现了宠物交易和系统管理两大功能模块，其中宠物交易有用户评价和用户交流两个方面，这个模块实现了用户登录注册之后可以按照自己的需求进行宠物寄存，期间可以一直关注宠物状态，服务结束之后可发表评论。使用本系统可以给喜爱和饲养宠物人群一个美好的体验，给生活带来便利。

Design and implementation of pet deposit management system

Abstract With the improvement of living standards, the pressure of work becomes greater, and people will use pets to relieve stress. Pets can bring a lot of happiness and make up for the lack of social needs. DINK families and middle-aged and elderly people will also choose animal partners to fill the emotional gap. Of course, the problem after raising pets is that the owners can't accompany their pets all the time. When the owners need to travel, travel or other things, pets also need their owners' company. At this time, a platform is needed to store pets. With the development of modern science and technology, people cannot live without the Internet. However, face-to-face communication and trading have become not so convenient. It is the choice of most people to exchange and trade on the Internet. Follow the development of The Times, establish a pet deposit management system.

Pet transaction and system management are realized. Pet transaction has two aspects: user evaluation and user communication. This module realizes that users can register their pets according to their own needs after logging in. During the period, they can always pay attention to the status of pets and post comments after the service. Using this system can give people who like and keep pets a good experience and bring convenience to life.
