The FIFA World Cup 2022 is underway in Qatar (卡塔尔). But this time, we enjoy hot pots instead of iced cola while watching the exciting games. Usually, the World Cup is played in summer. Why is it played in winter this year?

The reason is simple. Qatar is too hot in summer! In summer, the temperature (温度) there could reach up to 50°C. When winter comes, the temperature drops to around 20 - 30°C. That's much better for outdoor sports. To make players and fans feel cooler, Qatar also installed (安装) air - conditioning in the soccer fields.

Qatar is a small country in the Middle East. It is smaller than Beijing. But it has lots of oil and natural gas. These make the country one of the richest in the world.
