
衡阳市杨梓坪村的洪涝灾害治理研究

摘 要

本文以衡阳市杨梓坪村在 2019 年 7 月份的特大洪涝灾害中的防治实践为基础，借助洪涝灾害防治过程中的灾前预防、灾中救援和灾后重建的分析框架，剖析了该村的洪涝灾害治理情况。研究发现，杨梓坪村的洪涝灾害治理能力不足，难以采取积极有效的灾害防治行为来应对突发性的、影响范围大的洪涝灾害。同时，此次洪涝灾害治理过程中涌现了一些有利于灾害防治的新情况，如新技术的应用和社会治理力量的协助等。这些都为该村洪涝灾害治理能力的发展提供了可能性和新的选择。本文将通过对杨梓坪村治理洪涝灾害案例进行介绍的方式，在分析杨梓坪村在洪涝灾害治理中存在的问题及其产生原因的基础上，结合洪涝灾害治理过程中涌现的积极治理因素，为乡村灾害防治能力的提高提供一些建议，推动我国乡村治理的现代化。

关键词：杨梓坪村;洪涝灾害;灾害防治;治理

Abstract

This article is based on the prevention and treatment practices of Yangziping Village in Hengyang City in July 2019 during the major flood disasters, and analyzes the village's Flood disaster management situation. The study found that the flood disaster management capacity of Yangziping Village is insufficient, and it is difficult to take active and effective disaster prevention and treatment actions to deal with sudden and large-scale flood disasters. At the same time, some new situations that are beneficial to disaster prevention and treatment emerged during the flood disaster management process, such as the application of new technologies and the assistance of social governance forces. All these provide possibilities and new options for the development of the village's ability to manage flood and waterlogging disasters. This article will introduce the case of Yangziping village flood control, based on the analysis of the problems and causes of Yangziping village in flood control, combined with the positive governance factors that emerged during the flood control process, it will provide rural disaster prevention and control capabilities. Provide some suggestions to promote the modernization of rural governance in China.

Keywords: Yangziping village, flood disaster, disaster prevention and control capacity, governance
