My Green School Library

I want to design a green school library.

It will be greatly different from the present ones. The library is green, blue, white and it is in the shape of spaceships with all kinds of electrical appliances. It will use solar power and be controlled by computers. Smart and green, isn't it? What's more, it is made of recyclable materials (材料) which are environment-friendly to our Earth. Thanks to the modern computer system, students can lend the books we are interested in and return them conveniently by scanning our face. The most exciting thing is that you can listen to music in your seat to relax yourself when you feel tired. (It is large enough so that you can also rest inside and feel comfortable.)

What a wonderful library it is! I can't wait to experience it.

Welcome to our school. I’m Lin Tao. I’m glad to introduce our Green Planet Club to you. All our club members meet every Friday afternoon to do something meaningful.

We have DIY workshops. Here, old clothes can be made into handbags. It’s also fun to use recycled bottles and used wood to make furniture like chairs and desks.

Working as volunteers is our task as well. We hand out leaflets and tell people the importance of living a green life. Sometimes, we teach people how to separate waste in communities and help clean up parks and streets. Besides, we look after flowers and trees in our school.

Let’s work together for a green planet. Thank you!

假如你是李华，你的英国朋友 Peter 给你发邮件询问你们学校学生在新型冠状病毒肺炎疫情期间的学习情况。请用英语回复一封邮件，告诉他你们疫情期间的学习时间、地点；学习内容与方式以及你的学习感悟。

提示词语：the novel coronavirus (新型冠状病毒), online, course, special, hard

提示问题：

● When and where do you study?

● What and how do you study?

● How do you feel about it?

Dear Peter,

I'm glad to receive your email.The novel coronavirus made the spring of 2020 very different. As the virus can easily spread from one to another, the students in primary and junior high schools didn’t have to go to school. At the same time, online education has become popular among them. Students could learn on the Internet instead of sitting in the classroom. I learned by surfing the Internet, watching videos and taking notes during this special period of time. My parents are mainly responsible for cooking. To prevent COVID-19 from spreading, we have to stay at home.

At first, my parents were against online courses that would bring myopia (近视) and some other influences, but after a few days of carefully watching, they believed online education would be good for their children’s study. But many schools only regard online education as a second

choice. In fact, schools and teachers should keep a more open mind to accept online education.

Yours,

Li Hua

Someone was asked why he believed Murph would come to in front of the bookshelf to help him? Because of love, she was guided by love and made the right choice.

When Coop got back to earth, his daughter was dying.Love is an eternal(adj.永恒的)power that cross all dimensionalities (维度). Because of love, anything is possible.We believe in science and love all the time.

Finally, I have a question:If the earth is really unable to live, where should we go?

I am very glad to share with you this special festival. Let me tell you about Teachers' Day. Teachers' Day is on the 10th of September each year. Teachers not only give lessons, but also educate us to be better people. We celebrate this festival to show our gratitude for the teacher's hard work. Sometimes we give gifts, flowers and cards to teachers. There can also be parties held for teachers. Last year, we brought food to school and treated the teachers. The teachers enjoyed our food and told us stories about students they used to teach.

I think Teachers' Day is like a thanks-giving day especially for teachers. Why don't you celebrate it in your own style?

Wish you good luck in Changzhou.

Yours

Sam
