

Objectives

- Understand how CyberArk integrates with other Enterprise Software.
- Understand Identity & Authentication functions in CyberArk.

SMTP Integration

Purpose

Email integration is critical for monitoring vault activity and facilitating workflow processes.

Prerequisites:

- Have the IP address of the SMTP Gateway Available.
- Ensure that any necessary firewall rules or ACLs allow communications from the Vault Servers to the SMTP Gateway.

SMTP Setup

The screenshot shows a web administration interface with a blue navigation bar at the top containing the following menu items: POLICIES, ACCOUNTS, APPLICATIONS, REPORTS, and ADMINISTRATION. The ADMINISTRATION menu item is highlighted with a red border. Below the navigation bar, there is a 'Setup Wizard' icon and the title 'System Configuration'. A list of configuration categories is displayed, including 'Component Settings', 'Name', 'Options', 'Safe Templates', 'LDAP Integration', 'Notification Settings', and 'Platform Management'. Below this list is a section for 'Central Policy Manager' which includes a dropdown menu currently set to 'PasswordManager' and a link for 'CPM Settings: Auto-detection'.
