Introduction courseware for English academic paper
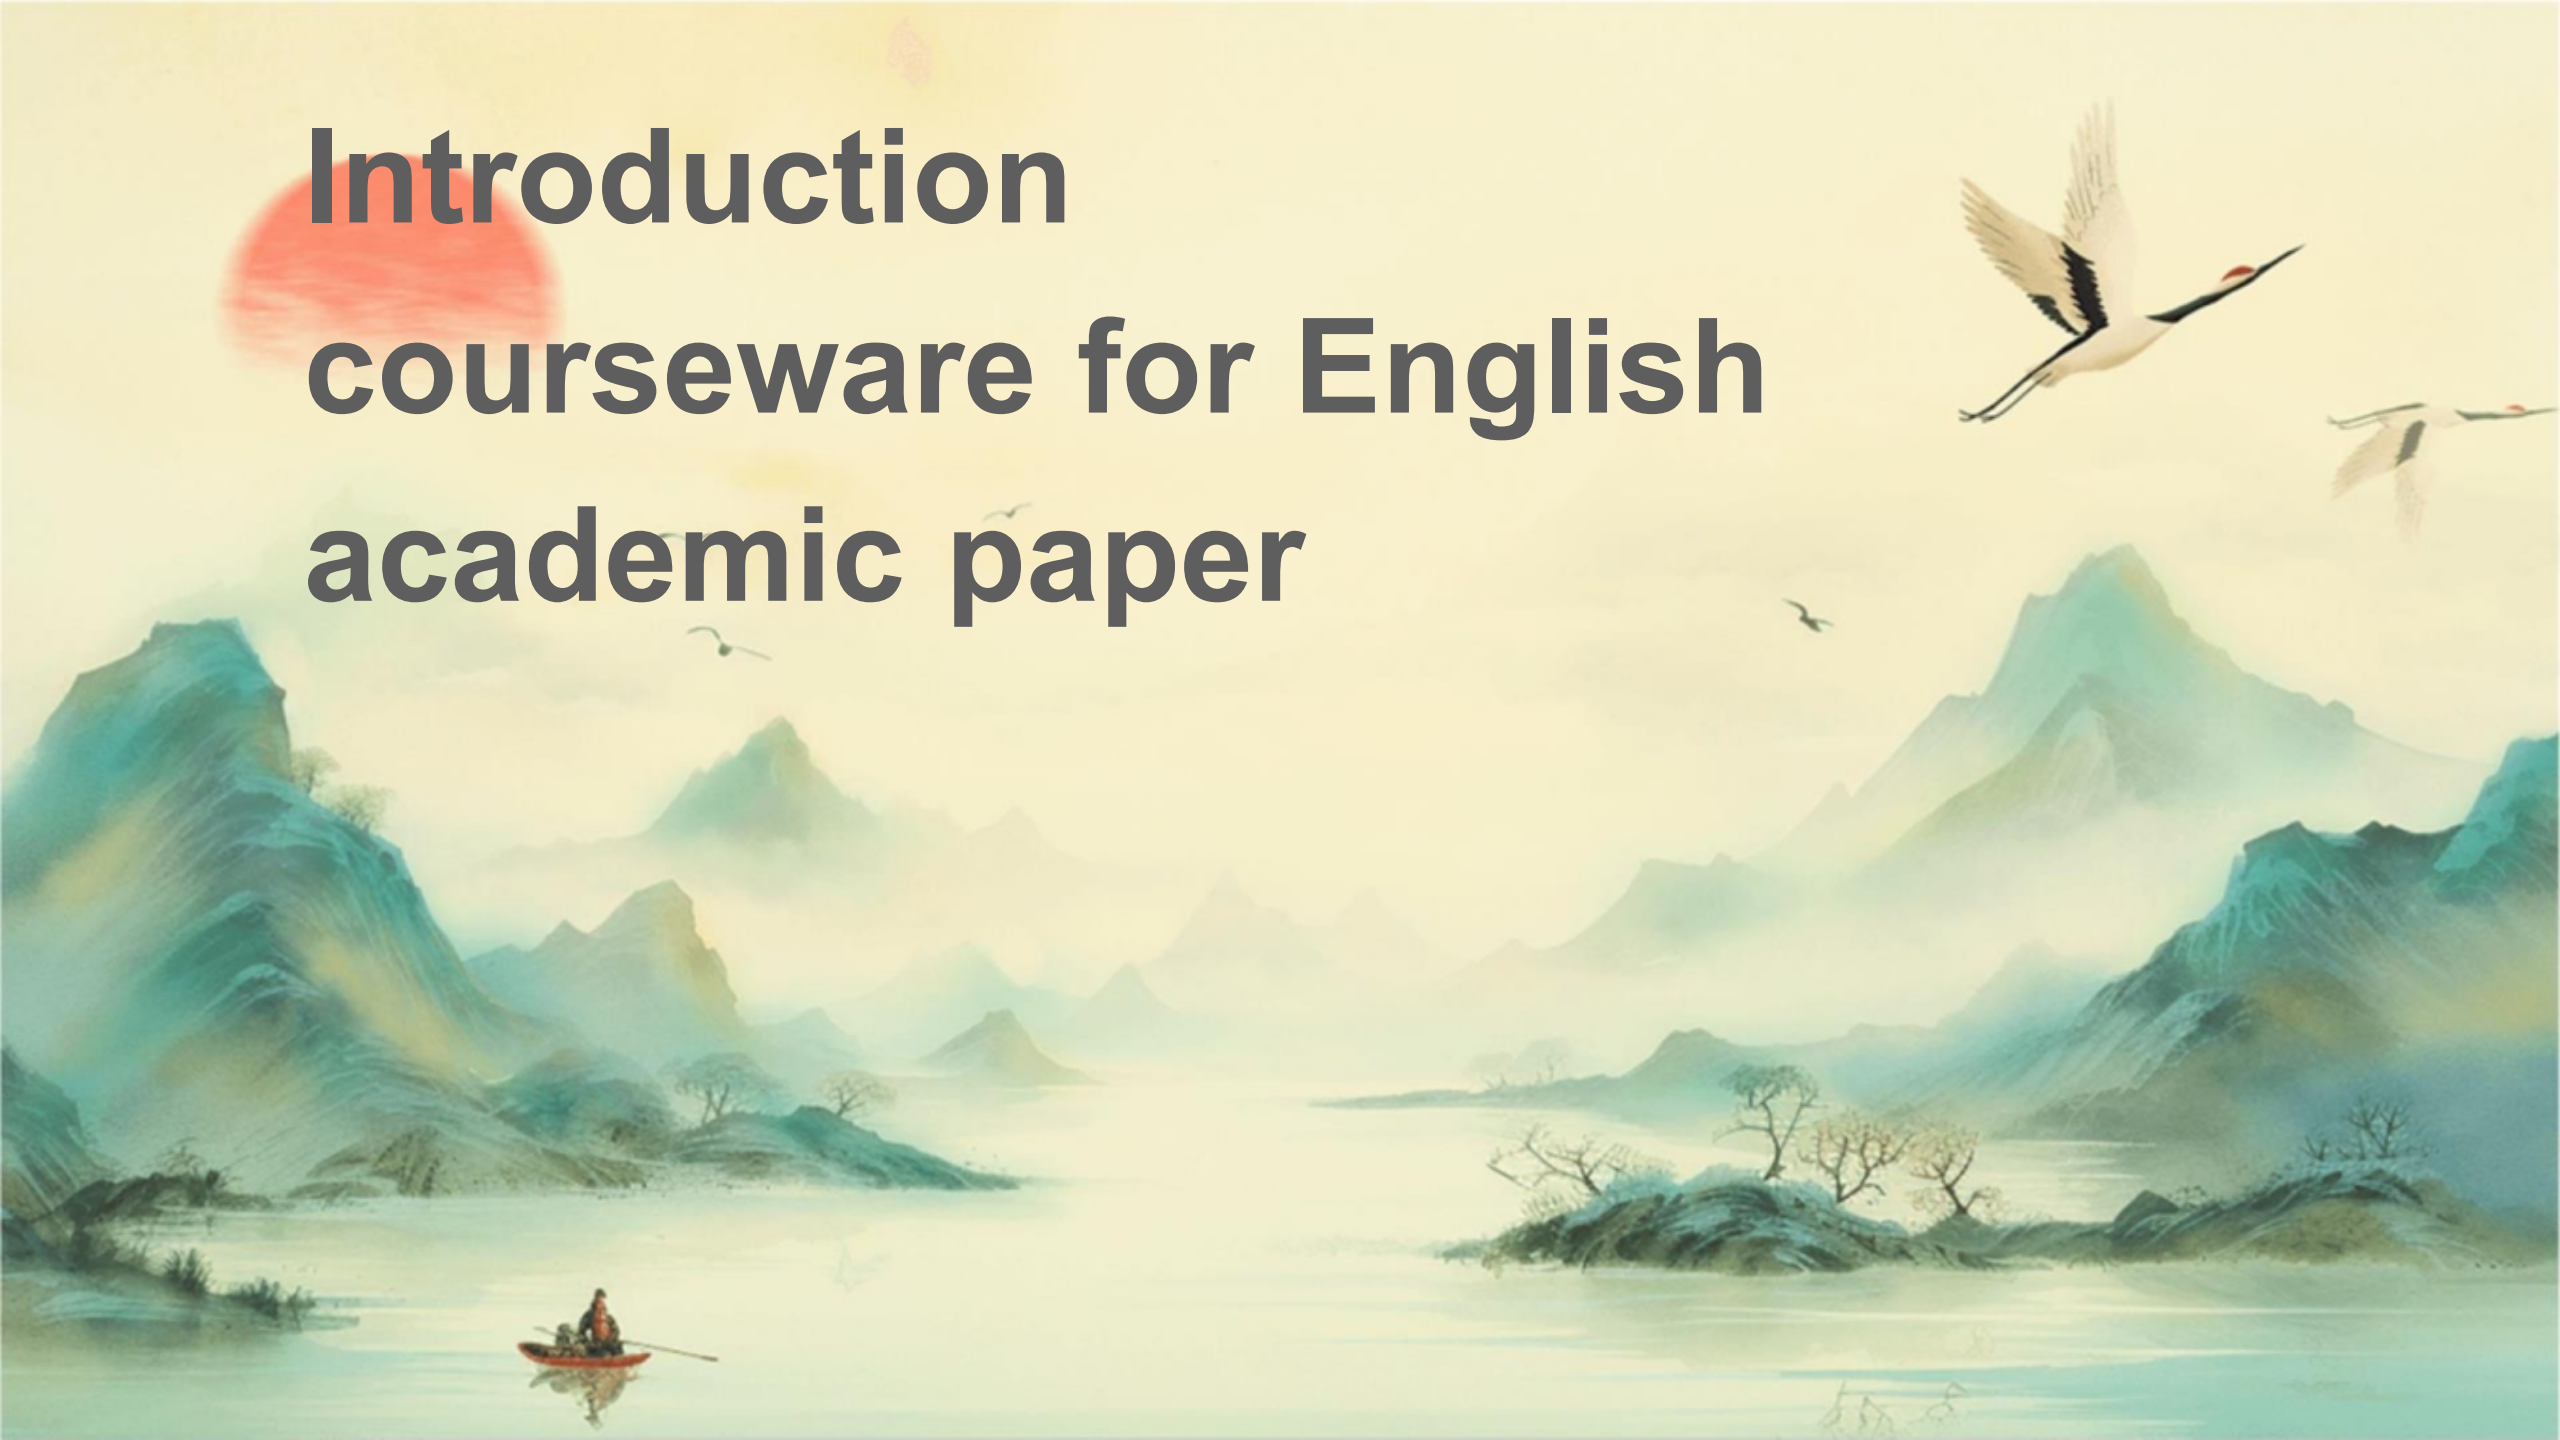

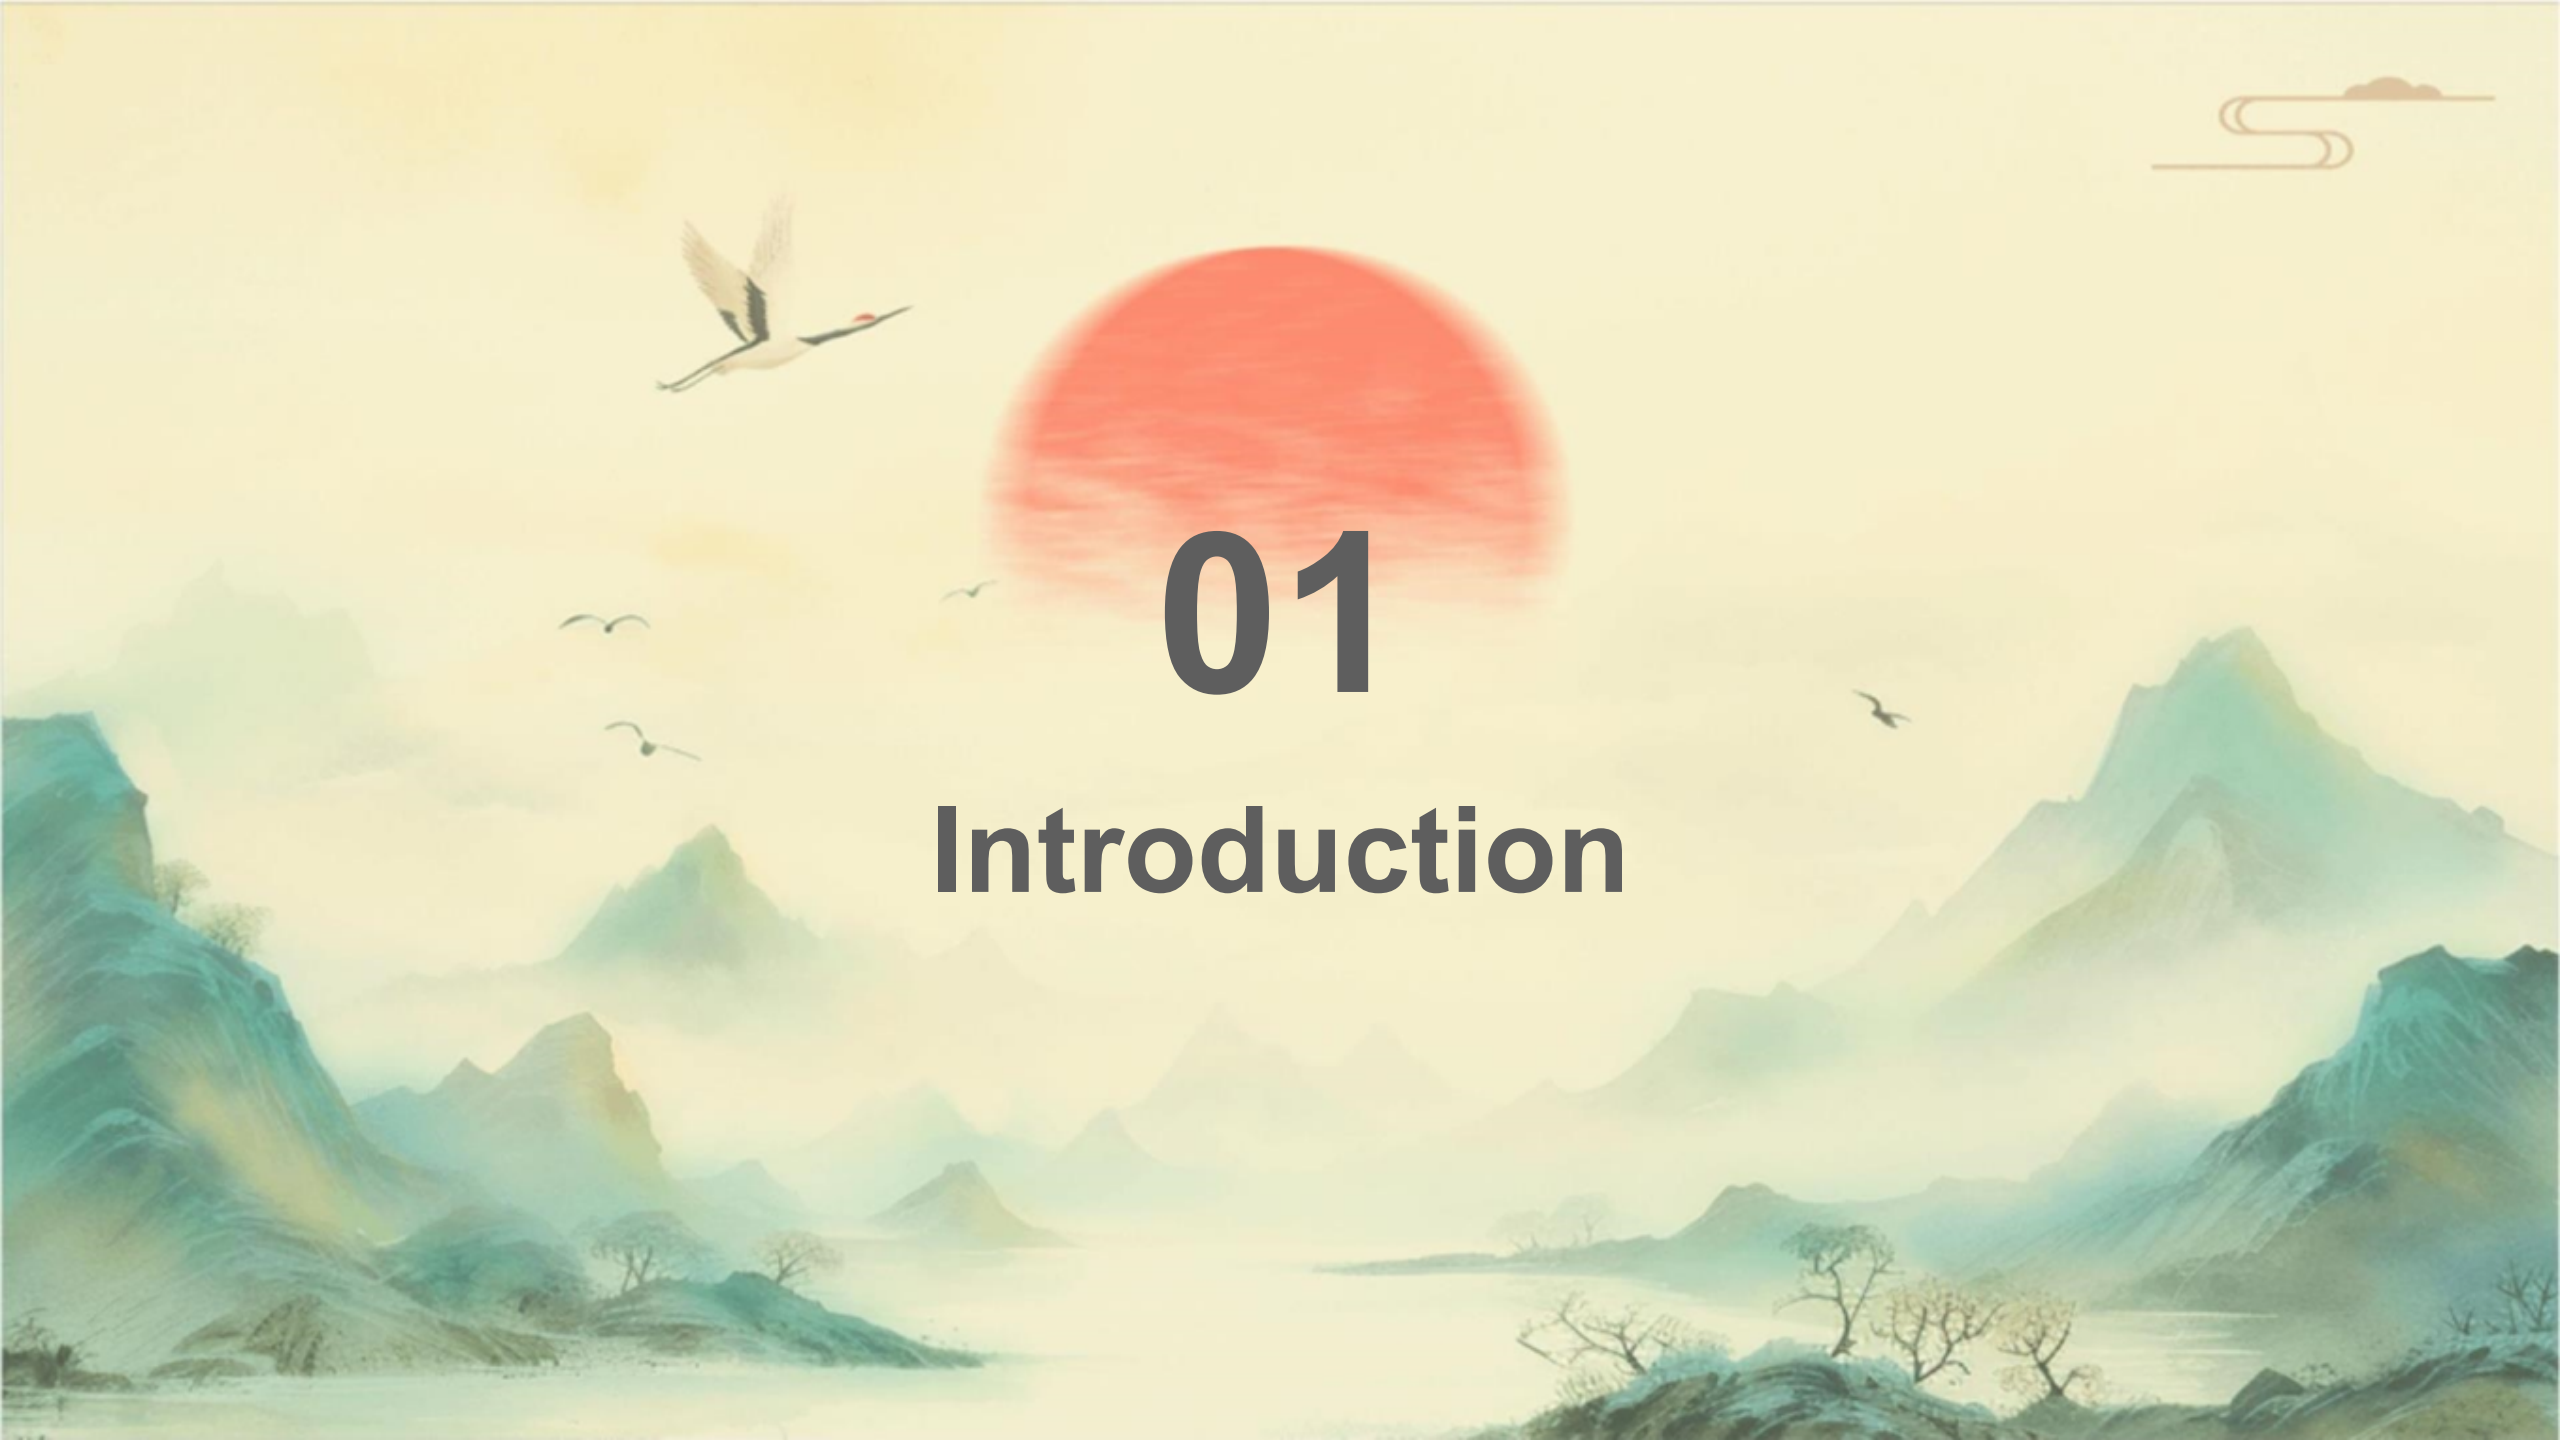

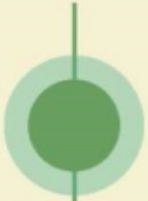

目录

01
Introduction

Course Introduction

Course objectives

This course aims to provide students with the knowledge and skills required to write high quality academic papers in English

Course content

The course covers the essential elements of academic writing, including the structure, language, and formatting of academic papers
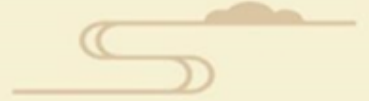

Course delivery

The course is delivered through a combination of lectures, workshops, and online resources to ensure a comprehensive learning experience

The Importance of Academic Papers

Development of critical thinking

Writing academic papers helps students develop their critical thinking and analytical skills, which are essential for success in higher education and beyond

Communication skills

Writing academic papers requires students to communicate complex ideas clearly and effectively, a skill that is highly valued in professional settings

Scholarly contribution

Academic papers contribute to the scholarly conversation, allowing students to share their research findings and ideas with a wider audience

The basic structure of academic papers

01

Title page

This page includes the title of the paper, the author's name, the institutional affiliation, and contact information

02

Abstract

The abstract provides a brief overview of the paper's purpose, methods, key findings, and conclusions

03

Introduction

The introduction sets the stage for the paper by providing background information and outlining the research question or hypotheses

04

Methods

This section describes the research design, data collection, and analysis methods used in the study

05

Results

This section presents the findings of the research, typically in the form of tables, figures, and charts

02
Academic paper writing skills

Topic selection skills

Topic Interest

Ensure the topic alignments with your interests and expertise, increasing the likelihood of a well researched and engaging paper
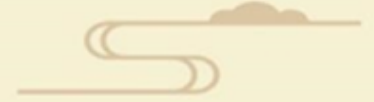

Origin

Select a topic that offers original contributions to the field, avoiding topics that have been extensively covered

Feasibility

Advisor the amount of available resources and time required to complete the paper, ensuring manageable scope and length

Literature review techniques

Broad Search

Conduct a wide search to identify key works and the overall state of research on the topic

Critical Analysis

Evaluate the reliability, validity, and methodological soundness of the sources in your review
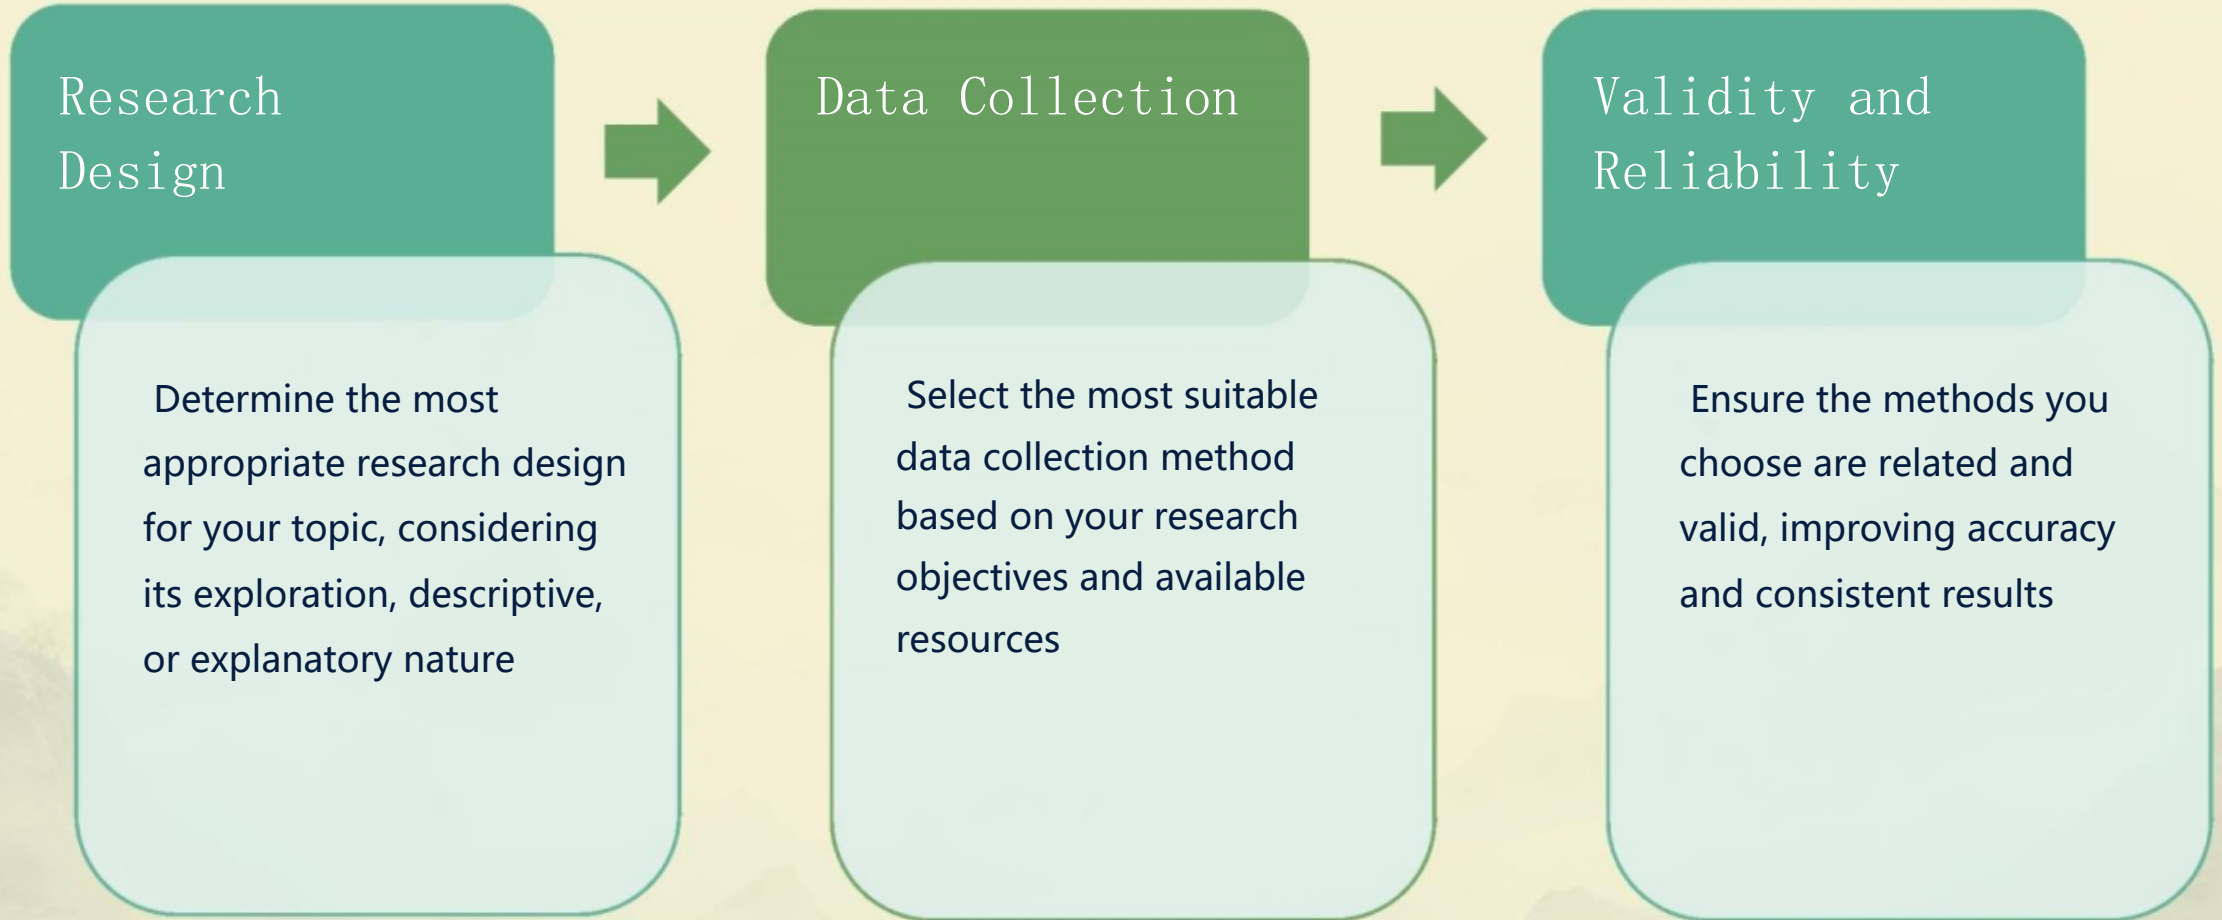

Theoretical Framework

Locate the theoretical framework that best aligns with your topic, advancing a coherent structure for your review

Research Method Selection Techniques

Research Design

Determine the most appropriate research design for your topic, considering its exploration, descriptive, or explanatory nature

Data Collection

Select the most suitable data collection method based on your research objectives and available resources

Validity and Reliability

Ensure the methods you choose are related and valid, improving accuracy and consistent results

03

Language norms for academic papers
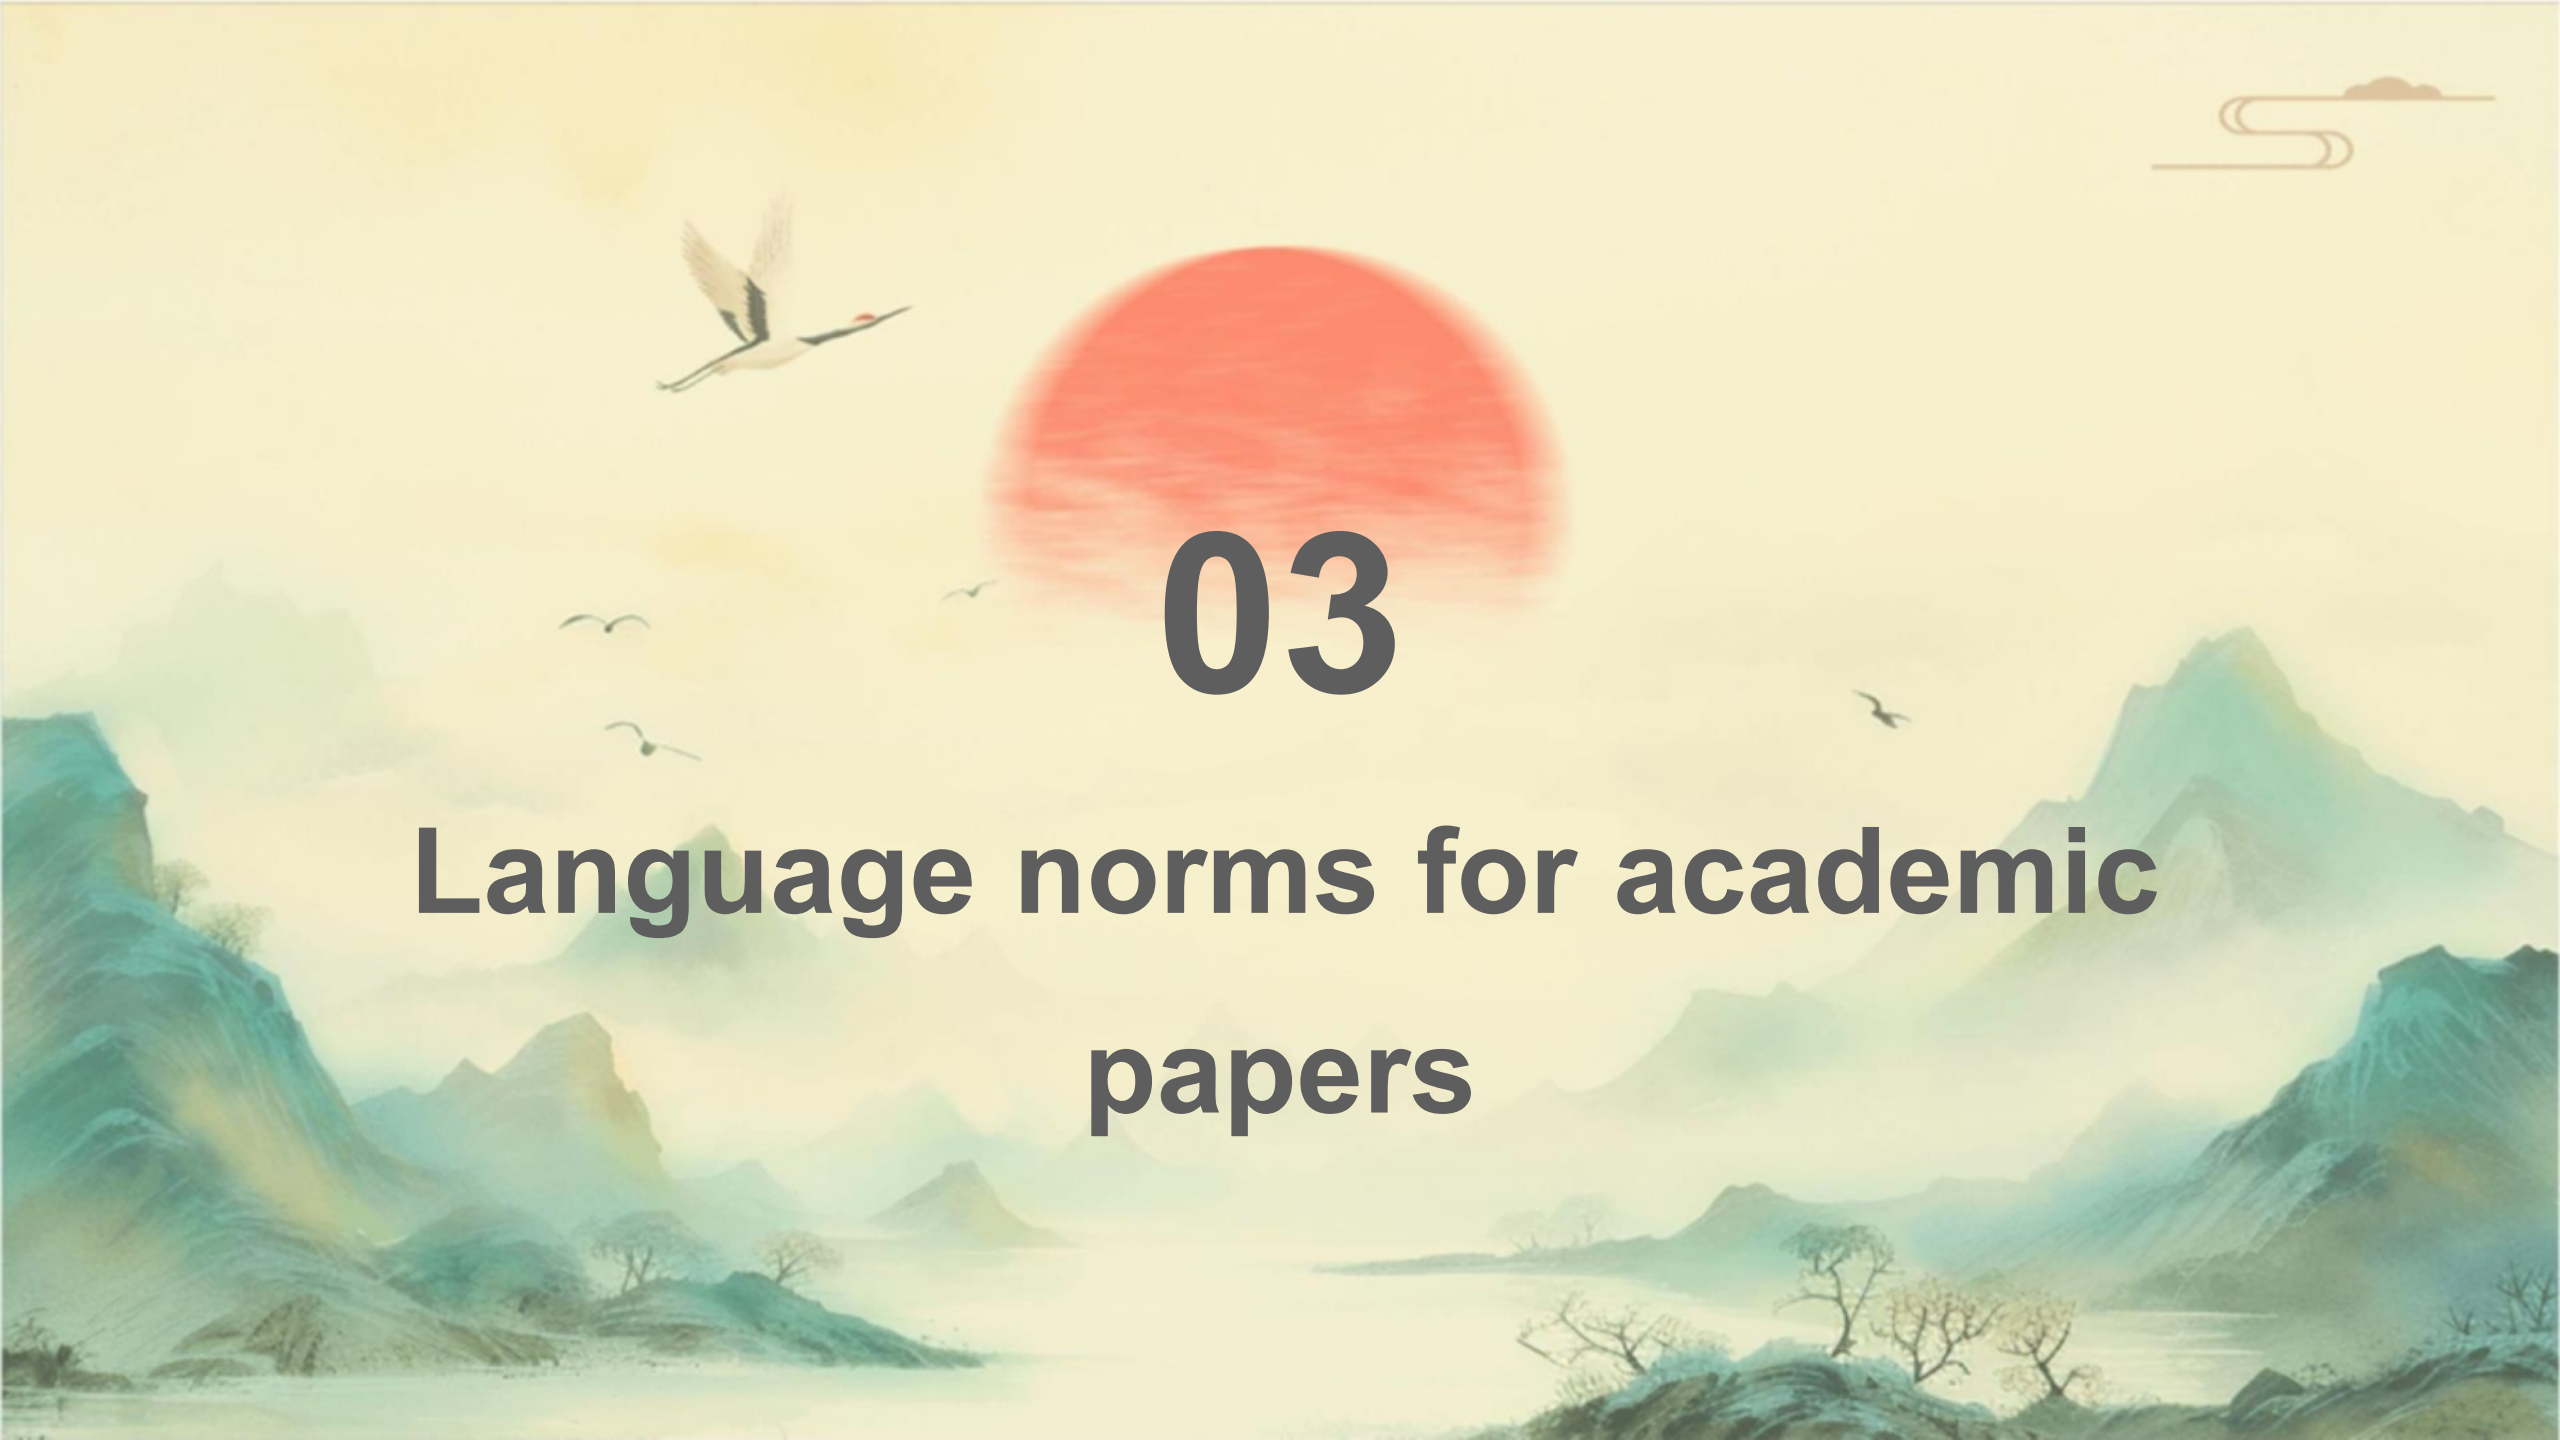

The importance of language norms

Language terms ensure clarity and precision

Using the appropriate language terms in academic papers helps to preserve information clearly and accurately, avoiding fusion and misinterpretation

Language norms maintain academic integrity

Following the language norms commonly used in academic circles guarantees that the research presentation is given the proper context and is evaluated fair and objective

Language norms facilitate communication

By adapting to the language norms, researchers can better communicate their ideas and findings to their peers, promoting the advancement of knowledge within their field

The Language Characteristics of Academic Papers

Formal language usage

Academic papers typically use a formal and objective tone, avoiding colloquial language and emotional expressions

Technical vocabulary

Specialized vocabulary and jargon are often used to discuss academic concepts, ensuring clarity and precision in communication

Complex presence structure

Academic papers of ten features

Citation and referencing

Academic papers are relatively healthy on citations and references to support claims and provide a foundation for further research
