

R-Controlled Vowel Cards

This packet includes 82 R-Controlled Vowel cards. Each card displays a word and a picture to go with it. I've also included headers (within each file) and black letter tiles (in two font sizes) with the red-color option for vowels.

The possibilities for these phonics cards are endless. These can be used to introduce phonics words to larger groups, smaller groups, during RTI time, one-on-one instructions, as a literacy center activity, for review, or as a free-time activity to keep your students engaged.

You can laminate them, store them in an envelope or Ziploc bags, and have them ready for many years to come. You can also hole punch these cards on rings.

R-Controlled Vowels (82 cards):

- AR (16), ER (22), IR (15), OR (17), UR (12)
