
暖气散热器清理设备的设计与研究

**Design and research of radiator cleaning
equipment for central heating**

摘要

随着科技的不断进步进步与发展，各式各样的电子清洁设备层出不穷，人们的清洁过程变得更加的便捷和高效，但仍有一些居住空间中的卫生死角因缺乏针对性的清洁产品而难以清洁，这对清洁产品设计提出了新的挑战。本文的主要研究内容是暖气散热器清理设备的设计，主要分析了清洁产品行业发展现状以及前景、暖气散热器发展的适用环境，总结出清洁者对于暖气散热器清理设备的功能需求，并最终根据用户需求进行设计实践，完成暖气散热器清理设备设计。

关键词 产品设计 清洁产品 散热器 暖气

ABSTRACT

With the rapid development of science and technology, various kinds of cleaning equipment are increasingly numerous in people's life, making the cleaning process more convenient and efficient. However, there are still some dead corners in living space that are difficult to clean due to the lack of targeted cleaning products, which poses a new challenge to the design of cleaning products. In this paper, the main research content is the design of heating radiator cleaning equipment, mainly analyses the cleaning products industry development present situation and prospects, suitable environment for the development of central heating radiator, summed up the clean functional requirements for heating radiator cleaning device, and finally
