

题目	企业考勤系统的设计与实现
----	--------------

---

## 摘 要

当今是信息化社会，越来越多的企业利用计算机进行管理，考勤人员不再手工记录而是直接利用计算机进行考勤。在没有计算机的时代，考勤人员都是自己记录下来，这种方式容易出现纰漏，保密性差而且查找信息也不容易，过于繁琐。直到计算机的出现并普遍运用的时候，考勤管理变得简单起来，直接在计算机进行操作就可以了，大大减轻了考勤人员的负担，随着管理效率不断提高，企业的经济效益也随之增加。

本系统采用JSP+ Tomcat+ SQL Server的开发环境，利用考勤管理系统，可以掌握员工的上下班状态和考勤情况等。

本系统为企业的考勤工作节约了大量的时间，信息维护起来非常方便，也大大减轻了考勤工作人员的工作量。

**关键词：**JSP；SQL Server；考勤；管理系统

## **ABSTRACT**

Today is an information society, more and more company are using computer to check on attendance, attendance staff no more hand-kept but directly use the computer for attendance. In an era without computers, the attendance people write it down themselves, this kind of way is very easy to appear careless mistake, security is bad and find is not easy, too tedious. Until the advent and widespread use of computers, attendance management becomes simple, do it on the computer, lighten attendance people burden, with the improvement of work efficiency, the economic benefit of the company also increases .

This system adopts JSP+ Tomcat+ SQL Server development environment, take advantage of attendance management system, can master the status of employees and attendance, etc.

This system saves a lot of time for the enterprise's attendance work, information maintenance is very convenient, but also greatly reduce the workload of the attendance staff.

**Key words:** JSP, SQL Server, Attendance, Management System
