Do you hear of the horse-face skirt, or mamianqun? Is there a horse's face on the skirt? Well, the skirt has three pieces.

The middle one looks like a horse's face. Some people believe that's how the skirt gets its name.

Mamianqun may be the most popular clothing in China this year. It has a long history and can date back to the Song Dynasty. In 2022, French fashion brand (品牌) Dior even used the design of this skirt for their clothes. Then many hanfu lovers helped more people learn about the Chinese-style skirt. "For us, wearing the skirt is not just for fashion," said Mao, one of the hanfu lovers. "It shows our love for Chinese culture (文化), too."

Now more and more people begin to wear the skirt. Many famous Chinese people like to wear it to take part in different activities. In the last Spring Festival, many young people wore the skirt when they went on trips. This brought them lots of fun and interest.

People in other countries like this skirt, too. Chinese clothing companies say the number of the orders (订单) for mamianqun is becoming more and more. People from over 90 countries and areas searched information about the skirt on the Internet last year! This fully shows that Chinese culture becomes the world's now.

Now "new Chinese-style clothes" become a hot fashion idea. These clothes have both modern designs and old Chinese styles. They are popular among the people all over the world. All these show we are becoming more

and more confident (自信) in our culture. We believe that the “new Chinese style” will go on shining in different fields.

The Moon is missing! The Sun is missing too! We can't see them. Where did they go? Maybe Tiangou ate it! In the old Chinese story, Tiangou was a dangerous dog with dark red eyes and a large mouth. When it got angry, it would fly into the sky and bite the Moon and the Sun, so the sky became dark soon.

Now we know the story is not true. We can't see the Moon or the Sun because an eclipse happens. You can think about the picture in your head: when reading a book, someone walks between you and the light. The person makes a shadow on the book, so it is hard to see the words. This is the same way an eclipse happens. A lunar eclipse (the eclipse of the Moon) or a solar eclipse (the eclipse of the Sun) happens when the Earth or the Moon stops light coming from the Sun and makes a big shadow.

A full Moon is bright in the night sky. A shadow walks slowly across its face. It happens when the Moon, the Earth, and the Sun are in a line. The Moon moves into the Earth's shadow, so it looks dark. We see the Moon again when it moves out of this shadow. Sometimes the Moon, the Earth and the Sun are in a straight line and the whole Moon is in Earth's shadow. This is a total lunar eclipse. Sometimes the Earth's shadow does not hide the whole Moon. This is a partial (部分的) lunar eclipse.

If the Moon, the Earth, and the Sun are in a line, but the Moon stands between them, what will happen?

27. Why does the writer talk about Tiangou in Paragraph 1?

- A. To make readers interested in eclipses.
- B. To make readers believe the old stories.
- C. To show an angry dog can be dangerous.
- D. To show Chinese knew eclipses years ago.

28. What does the underlined word "shadow" in Paragraph 2 mean?

- A. A ghost.
- B. A dark area.
- C. An open space.
- D. A strange thing.

29. When a lunar eclipse happens, \_\_\_\_\_.

- A. the Sun stops shining in the sky
  - B. the Moon and the Sun change places
  - C. the Earth or the Moon stands in front of the Sun
  - D. the Moon, the Earth, and the Sun stand in a line
30. What will the writer talk about in the following paragraph?
- A. How the lunar eclipse comes.
  - B. How the solar eclipse comes.
  - C. How the sunlight comes to the earth.
  - D. How the moonlight comes to the earth.

Do you enjoy cycling when you are free? Do you think cycling is a sport? Years ago, most Chinese people rode bikes to work or study. Only a small group of them thought it was a sport. But now more and more people feel more than that and get fun from it.

Cycling is becoming popular. Bike riders share their favourite ways and health tips about cycling on some apps like Xiaohongshu or Sina Weibo. On Xiaohongshu, there are over 2.5 million people talking about

cycling and on Weibo, people look through the topic of cycling more than 700 million times. A bicycle company says one of its shops sells more bicycles, about 20% to 30% more than the same period a year earlier.

Now, many cities in China build cycle-only paths and China has many cycling activities, like the Qinghai Lake Cycling Race every July. People from all over the world take part in it. Why do so many people go cycling? For one thing, more people put their health in the first place. For another thing, their need for outdoor exercise becomes stronger. Cycling seems to be a good way for people to run away from the busy city life. It makes people feel they are outside, near beautiful lakes and hills.
