So some of them are very proud of not making up and staying the way they are, but the new idea is that make up is a manner.

In the traditional view, make up is not a good girl will do, only for the bad girl who tries to seduce a man. What' s more, parents implant the idea to the girls that make up will make them look older. So most girls

have the wrong idea about make up, some even feel shameful to talk about it.

Actually, in the modern society, make up is just a way of manner. But, the make up we talk about is light type. We need to shape our eyebrow and color our lips with light color, which makes us look tidy. Hair is also needed to clear up and the clothes we wear should be adjusted by different occasions.

大学期末英语作文 8      When I was a little girl, I always wanted to go to college I have asked myself the same question so many times:Why I go to college? You may say: you go to college just because you want to have a good job after graduation.

The major reason is that I need to further my education and know more about the outside world But in the college, I have abundant time to read the books I'm interested in and travel to different places to broaden my horizon As I am a typically southerner, I find there are many differences between north and south after I come to college, such as the way they talk, and the food they used to eat And I don't want to be a person with a tunnel vision; I want to make more friends during the four years With the working experience and degree, I can find an ideal job I'll spare no efforts to make my dream come true And I will learn experience and challenge myself in this four year and be a better man.

大学期末英语作文 10 To read English books and magazines is one of the main purposes of English learning. If you can understand the contents, you will feel happy.

Many people want to improve their English through reading, so they begin to read all kinds of English books and magazines with high expectation. But many of them give up halfway because of some difficulties. What a pity! They lack persistence.

I have some suggestions to offer. First, they

should pay attention to the reading materials they choose. Those materials should be not only interesting, but also not too difficult. Otherwise, it will be easy for the readers to lose heart. Second, don't consult dictionaries during reading. That will disturb you and make the reading boring. Last but not least, choose a quiet place to yourself. The environment is also crucial to reading, especially English reading. You have to concentrate your mind. Try these, and you will make progress.

大学期末英语作文 11      With the fast pace of modern life, more and more people are living under great pressure.

Some people are afraid of pressure. They think that the stresses and strains of work deprive them of joy and happiness. In their view, stress does harm to them both physically and mentally. That is why they prefer something less competitive and strenuous to something more demanding and challenging. Others argue that stress isn't as bad as it is often supposed to be. Unless it is overwhelming, a certain amount of stress is vital to provide motivation and stimulation. Without stress, you may slack off and idle away your time. It gives purpose and meaning to an otherwise meaningless, dull

life. People under stress tend to bring their potential into full play and to realize their goals.

In my opinion, we shouldn't escape from stress but to face it as it is. What we can do is to adapt to the stress and to profit from it rather than to avoid it.
