The end of the year is drawing near, and winter is in full activity. The season brings along with its strong winds and snow — an environment that's never comfortable to be in.

This unpleasant and even frightening part of winter can be often seen in literature. In Shakespeare's King Lear (1606), the king has given away his kingdom and been driven out by his two ungrateful daughters. He is out in the winter cold, suffering (遭受痛苦) things that are usually saved for the poorest and most unlucky human beings.

The winter is bad enough for Lear, but being driven out by his family is worse. A song from another Shakespeare's play, As You Like It(1599), is fitting for this poor old man's situation: "Blow, blow, thou winter wind/Thou art not so unkind/As man's ingratitude (忘恩负义)". Here, winter is used to bring out the ugliness of inhumanity (无人性). There aren't many things that are worse than winter, according to Shakespeare.

Once winter became less of a danger to human beings, it became

more positive in literary works. Since Charles Dickens, the representation of the season in literature often has something to do with happy Christmas celebrations.

The cold of the winter weather provides a contrast (对比) to the fun going on indoors.

Dickens' A Christmas Carol (1843) was the start of this, but Christmas is still a common, cheery element (元素) in stories that feature winter scenes today. Consider the joy felt by Harry Potter and his friends in J. K. Rowling's Harry Potter and the Philosopher's Stone (1997) as they sit down for their festive meal：

"Harry had never in all his life had such a Christmas dinner. A hundred fat, roast turkeys; mountains of roast and boiled potatoes; platters of chipolatas; tureens of buttered peas, silver boats of thick, rich gravy and cranberry sauce."

It is almost as much a pleasure to read about the meal as it might have been to eat it.

Although winter still isn't the most cheerful season in novels and poems, it's safe to say that writers have surely "warmed up" since Shakespeare's days.

1. What can we learn from Shakespeare's works

A. Winter is compared with the ugly side of humanity.

B. Shakespeare didn't like winter for its bad weather.

C. It's in winter when King Lear drove his two daughters off.

D. King Lear was forced to give away his kingdom in a cold winter.

2. The author mentions Charles Dickens in the passage because ____.

A. a lot of his works are related to winter.

B. he started a new way of representing winter

C. he is the most popular author of winter stories.

D. his works make people feel cheerful in winter

3. The example of Harry Potter and the Philosopher's Stone is used mainly to show ____.

A. Christmas is still a symbol of joy in modern stories.

B. traditional Christmas food makes the winter cheery

C. it's a pleasure to read Christmas-related books in winter

D. winter has become the happiest season in literary works

4. The author's main purpose in writing this article is to ____.

A. recommend some winter stories in literature.

B. explain what winter is like in literary works

C. describe certain customs that are related to winter.

D. tell us why winter is described as unpleasant in literature

Aladdin made a wish to the magic lamp, "Please build a beautiful

palace next to the king's palace." The next morning, the king found a new palace and a golden walkway between his palace and the new palace. The king met Aladdin at the door when he went to see the new building. Aladdin said, "My Lord, this is my present to the princess. In this way, you can still see each other even after she is married." The king was touched by Aladdin and agreed to let Aladdin marry his daughter.

The wedding of Aladdin and the princess was big and celebrated by the whole city. The magician (魔法师) heard this and decided to bring the lamp back. He made several beautiful lamps and then went to Aladdin and the princess's palace. He talked to their servants, "Do you have any old lamps You can exchange them for my new lamps because I'm interested in royal(皇家的) things." The servants rushed to tell the/princess the strange news. The princess agreed and asked them to take Aladdin's lamp to the magician because she believed it was just a common old lamp.

After getting the lamp, the magician quickly made a wish, "Take me home with Aladdin's palace and the princess." When Aladdin got home at night he found the palace and the princess were gone. "Maybe the wicked(恶的) magician was back," he thought. Aladdin felt very sad. Suddenly, he remembered the magic ring:

Aladdin asked the ring to bring his wife and palace back.

"I'm afraid I can't. It depends upon the magic lamp." replied the ring.

"But at least you can take me to my wife wherever she is."

Then Aladdin was placed upon an area facing the princess's flat. The princess told Aladdin what happened that night through the window of the flat.

"Where did he put the lamp " Aladdin asked.

The princess replied, "He takes it with him all the time."

Aladdin was glad when hearing that. Then he passed the princess a small bottle and told her his plan.

That evening, the princess invited the magician to have a great meal. The magician became relaxed when seeing the delicious food and wine(葡萄酒). The princess then filled his cup with wine, again and again, so he soon got drunk. At this time, she secretly put something that Aladdin gave her into the magician's cup. He drank and soon fell asleep. After that, Aladdin came in. He found the lamp and made a wish. Finally, Aladdin and the princess got home safely. The magician was put in prison.

From then on, they lived a happy life and they did many good things for people with the help of the magic lamp.

—Taken from Aladdin and the MagicLamp

5. Which is wrong about the new palace

A. It was close to the king's palace.

B. Aladdin got the palace through the magic lamp.

C. It was a gift from Aladdin to the princess.

D. It was made of gold.

6. How did the magician get the magic lamp

A. By giving a wonderful magic show.

B. By exchanging a new lamp for it.

C. By giving a helping hand to the king.

D. By making a wish to a magic ring.

7. Which word can best describe Aladdin

A. Rich. B. Clever. C. Curious. D. Impatient

8. Which is the correct order of what happened according to the story

a. The magician drank cups of wine.

b . Aladdin had an idea of how to save the princess.

c. The palace and the princess were gone.

d. Aladdin and the princess returned home.

A. c-b-a-d B. a-c-b-d C. a-b-c-d D. c-a-b-d

9. What can we infer from the story

A. Aladdin made three wishes to the lamp in all.

B. The magic ring was less powerful than the magic lamp.

C. The princess didn't think the magician a nice person at first.

D. The king gave Aladdin something that could make the magician fall asleep in the small bottle.

The ocean is not a quiet place. This is partly caused by sea animals. They use sound to find what they eat, whom they play with, or which place they move towards. But the noise from human activities is increasingly troubling the lives of ocean animals.

According to scientists, loud noise may increase mass strandings (大规模搁浅) of sea animals. Researchers recorded only five of these events in the first half of the 20th century. From 1950 to 2004, they recorded more than 1,200 mass strandings. These were perhaps because of the use of sonar (声呐) underwater. Another main reason of loud underwater noise is pile driving (打桩). Piles are supports for bridges, oil and gas-producing areas. They're driven deep into the floor of the ocean. Driving a single pile can take several hours and result in as many as 5,000 hits. This process creates a lot of noise.

To restrain that noise, some companies are making use of tiny bubbles (气泡). A single bubble is easily broken. However, the bubble wall can make pile driving quieter. The bubble wall is usually created in this way: A tube (管子) is placed in a ring around

a pile. Air is then let out through closely spaced openings in the tube. When the bubbles rise, they act as a wall and take in some of the noise. Some more of the sound reflects back and becomes stuck inside the wall. Such bubble walls are really helpful.

Other changes to pile driving can help as well. For example, people can take breaks while pile driving and let animals travel through.

Our noise in the ocean is causing big problems. But small changes in our behaviors can make a big difference in animals' lives in the world's oceans.

10. What troubled the lives of ocean animals according to the text

A. The gas produced in the sea.

B. The food polluted by humans.

C. The noise from human activities.

D. The bubble walls made by some companies.

11. Which word is close to the underlined word "restrain"

A. Control. B. Increase. C. Make. D. Begin.

12. What is the structure (结构) of the text (P1＝Paragraph 1...)

A. B.

C. D.

13. Which can be a proper title for the text

A. Know Why Ocean Noise Form

B. Learn More about Sea Animals

C. Call on People to Protect Animals

D. Try to Make a Difference to the Ocean

Henry Leech was a good salesman. He sold lots of products. After a new kind of vacuum cleaner (真空吸尘器) was produced by his factory, he was sent to the countryside to sell it.

He drove out of town and stopped at a farmhouse. He knocked on the door and the farmer's wife opened it. Henry started into his speech immediately.

"Madam, how much time do you spend cleaning the floors " "A lot of time. This is a farm and things get dirty quickly," said the woman.

"And how much time do you spend beating the carpets(地毯) " asked Henry.

"A lot of time. My dog lays on them and it always makes a mess on the carpets."

"Well," said Henry, "this is your lucky day." Henry showed her his vacuum cleaner and said, "You can clean the house in 5 minutes with it."

The farmer's wife didn't look interested, but Henry still took out a big bag of dirt(尘土). He opened it and threw it all over the floor. The farmer's wife was very surprised. Before she could speak,

Henry said, "Madam, if this machine doesn't pick up every last piece of dirt, I will eat all of it!"

The farmer's wife looked at Henry and said, "WELL, I WILL GET YOU A SPOON. WE HAVE NO ELECTRICITY(电)."

14. It took the farmer's wife a lot of time to____ .

A. do some cleaning

B. do the farm work

C. feed animals D. cook meals

15. The farmer's wife wasn't interested in Henry's vacuum cleaner because____.

A. she hardly cleaned the floor

B. she had owned a vacuum cleaner.

C. she could hardly afford it.

D. it was useless to her

16. Which of the following is TRUE according to the passage

A. Henry asked the farmer's wife to get him a spoon.

B. Henry should listen to the farmer's wife.

C. There was something wrong with the vacuum cleaner.

D. It was difficult for Henry to go to the countryside.

When it's hot outside and we have to go out, surely we want to

keep cool. We can put on hats, wear light clothing, or stay at a cool place. However, nothing can beat a good fan. Now I'll show you how to make a good DIY (Do It Yourself) paper fan. What to prepare Please prepare two pieces of paper. All paper will work, but your DIY fan can be used for a long time with quality paper. Then get glue, two sticks, etc. How to make a DIY fan The first step is to draw pictures on the paper. Just draw anything you like. The next step is to fold up (折叠) the paper. Then glue the two pieces of folded paper together. After that, paint the sticks. The final step is to glue the sticks onto the folded paper. And everything is done. If you look at your watch, you will be surprised: it takes less than 15 minutes to make a good paper fan. Then you can fold it up and drop it in your bag. When you are out in the heat next time, just take it out and enjoy the gentle wind.

17. Which is the best way to keep cool according to paragraph 1

A. Putting on hats. B. Using a good fan.

C. Wearing light clothing. D. Staying at a cool place.

18. Why is quality paper a good choice to make a fan

A. It is light. B. It is colorful.

C. It lasts long. D. It looks beautiful.

19. What is the second step of making a paper fan

A. Painting the sticks.

B．Drawing pictures on the paper.

C．Folding up the paper.

D．Gluing the sticks onto the folded paper.

（2024·泰州模拟） 阅读理解

Have you ever wondered why we say maidongxi（卖东西）instead of mainanbei, shangcesuo （上厕所） instead of xiacesuo, and yijianxiangzuo（意见相左）instead of yijianxiangyou Many Chinese words have directions in them, and there is lots of history and culture hidden behind.

East or West

When going shopping, Chinese people say maidongxiinstead of mainanbei. A theory says that in the Tang Dynasty, there were two popular markets in Chang'an, the national capital at the time. One was called the East Market, and the other was called the West Market. When shopping, people usually went to the East Market first, and then went to the West Market. As time went by, people started to describe shopping as maidongxi.

Up or down

We use shangcesuoto mean "go to the bathroom" and xiachufangto mean "go to the kitchen". Why In ancient times, houses were laid out （布局）in a certain way. The gate of the

house would face south, with the bathroom in the northeastern part of the house and the kitchen in the southeastern part. On maps, north is usually at the top while south is at the bottom. In Chinese, we talk about the north as shangand the south as xia. So people would say they're going up to the bathroom and down to the kitchen.

Ancient Chinese not only used shangand xiato refer to （指代） directions but also social positions. For example, people used huangshangto refer to the emperor and dianxiato refer to princes who had a lower position than the emperor.

Left or right

Most people today are right-handed. They feel uncomfortable if they try to use their left hand to write or use chopsticks. This was true in old times as well. So in ancient China, "left" was related to （与……有关联）being different, such as in yijianxiangzuo. If people don't accept common beliefs （信念）, we still say they are following ___.

When shaking hands, it's important to know which hand to use. In most cultures, the right hand is generally used for a handshake. For example, in some countries, such as India and Nepal, the left hand is considered unclean. However, if you are in a culture where the left hand is used, you'd better do as the locals do.

"Left" and "right" also have something to do with people's social position. For a long time in ancient China, "right" stood for higher position than "left". For example, the character "佑", developed from "右", means a person in a higher position would protect someone in a lower position.

20. Why does the writer use shangcesuoand yijianxiangzuoin the first paragraph

A. To tell a story. B. To introduce the topic.

C. To give an example. D. To solve a mystery.

21. Which of the following Chinese expressions can be used as an example in "Where to buy things"

A. 东市买骏马，西市买鞍鞯 B. 东边日出西边雨

C. 青山横北郭，白水绕东城 D. 任尔东西南北风

22. Which picture shows the layout （布局）of houses in ancient China according to the passage

gate ; bathroom ; kitchen

A. B.

C. D.

23. Which of the following can be best put in ____

A. shangcuanxiatiao B. pangmenzuodao C. zuosiyouxiang

24. According to the passage, which of the following is TRUE

A. In ancient China, most of the people were left-handed.

B．In ancient Chinese, the word "right" meant being different.

C．In India, people should shake hands with their right hand.

D．When shaking hands, we should never use the left hand.

There are 706 billion LEGO bricks （积木）on the earth, 7 LEGO sets are sold in every second, and more than 400 million people have played with Lego bricks. LEGO has already been a successful company in the world. Actually, there are many ups and downs along with its development.

Start from woods

The LEGO company was set up in 1934. The name comes from the Swedish "leg godt", meaning "to play well". Ole Kirk Kristiansen, the founder of LEGO, was a master carpenter （木匠大师）, so it's not surprising that the first LEGO toys were made of wood. Theywere simple, such as wooden ducks. In 1942, the factory that made wooden LEGO toys was burned to the ground, which made Ole realize the disadvantages of working with wood.

Success—brick by brick

Soon Ole found out that plastic is a good material to make toys. LEGO started making self-locking bricks in 1949. But it wasn't until 1958, when the locking design was much improved, that sales were

rising. Because of its quality and the endless creativity that it lets children have, LEGO achieved a huge success.

Overcome difficulties

In 2000, children began to spend more time playing video games. By 2003, LEGO's sales were down by 30%, and LEGO nearly went broke. The turning point appeared in 2004 when LEGO focused again on its bricks. And it also worked with films and televisions, like Star Wars. The Internet was used to build a LEGO group where fans show their love to LEGO collections. In 2015, it again became a name known by the world.

25. What can we learn from the numbers in Paragraph 1

A. LEGO has a long history.

B. LEGO has achieved a huge success.

C. LEGO is the best company.

D. LEGO is going to have a bright future.

26. What does the underlined word "they" in Paragraph 2 refer to

A. Lego bricks. B. Plastic toys.

C. Wooden ducks. D. The first LEGO toys.

27. Which of the pictures shows the right development of LEGO company

A. B.

C. D.

28．Which of the following words can best describe Ole Kirk Kristiansen, the founder of LEGO

A．Friendly B．Creative C．Energetic D．Generous

29．What's probably the best title of the text

A．LEGO: from small to big

B．LEGO: toys and joys

C．LEGO: from wooden to plastic

D．LEGO: ups and downs

（2024·泰州模拟） 阅读理解

Bees are truly fascinating insects that we often see flying around gardens or woods. They move from one flower to another and might even come inside our homes. They make the skies of gardens or forests more beautiful.

What does a bee look like A bee has six legs and two sets of wings on each side of its body. Its body is divided into three parts: the head, thorax （胸部）, and abdomen （腹部）. Bees have two feelers on their heads called antennaeand two large eyes on each side. They come in different colors and shapes.

Then, are all bees the same No, they come in different colors and shapes, and there are many different kinds of bees. In Ireland, there are 101 different kinds of bees. However, only honey bees make

honey that we eat, while other bees don't make honey at all. There is only one kind of honey bee that lives in Ireland. The places that honey bees live in are also different, including hives （蜂箱）, holes and even nests made from leaves.

What does a bee eat Bees feed themselves with nectar and pollen （花粉）, which they collect from flowers. Nectar, a sweet liquid （液体）found in flowers, serves as the primary energy source for bees. Honey bees use it to make honey. Meanwhile, yellow pollen sticks to the bees' hairy legs as they gather food.

Why are bees important While we enjoy honey as a sweet treat and beeswax （蜂蜡）for candlemaking, bees play a far more important role in our life. Besides, bees are very important to nature because they bring pollen from one plant to another on their hairy legs. Without the hardworking bees, the growth of fruits and crops would be seriously influenced, highlighting their special role in protecting our environment and farming.

30. Which shows the right part called "antennae" of a bee

A. B.

C. D.

31. Why does the author mention bees' colors and shapes

A. To show how beautiful bees look.

B. To show what people like about bees.

C. To tell there're different kinds of bees.

D. To tell why bees like food from flowers.

32. What can we learn about bees after reading the passage

a. the food of bees b.the enemies of bees c. the appearance of bees

d. the importance of bees e. the types of bees

A. abcd B. acde C. bcde D. abde

33. What does the author think of bees according to the last paragraph

A. Bees work hard to plant crops.

B. Bees make our world colorful.

C. Bees help keep nature in balance.

D. Bees are good for making honey.

34. Which subject does this article belong to （属于）

A. Physics. B. Chemistry. C. Geography. D. Biology.

Romeo had been in a good mood all morning. He'd had a dream that he was about to receive some good news. He was lighthearted and he walked through the streets of Mantua feeling that his feet weren't touching the ground.

His dream was that Juliet had found him dead. And although it was

a strange dream that allowed a dead man to think and feel, she had brought him back to life with her kisses and made him as happy as a king. He smiled as he walked. It just showed how wonderful the real thing was if even dreams about love could make you feel so good. Wasn't that his man, Balthasar, coming down the street It was. It must be good news from Verona.

"Balthasar," he said. "Have you got a letter from the Friar How's my wife And my father Is he alright " Romeo did a little jig, dancing round his servant. "How's my Juliet I'm asking that because if she's well then everything is wonderful. "

Balthasar said nothing. He stared at the ground, avoiding Romeo's eyes. Romeo stopped his dancing. Balthasar was crying.

"She's well. So nothing can be wrong," said Balthasar. He turned his back on Romeo and blurted, "Her body's sleeping in Capulet's tomb（坟墓） and her soul's among the angels."

Romeo felt cold, even in that terrible heat. His expression doubted his servant's statement. "I watched them putting her in the tomb their family vault," said Balthasar, "and then came straight to you." He saw the pain in Romeo's face and wished he could think of some way of comforting him.

"It can't be!" said Romeo at last. He turned away. "The stars are against us. But I won't give into them!" He turned back to Balthasar.

"Go and get me some paper and ink and hire us some horses."

"I beg of you, sir," said Balthasar, "be careful. You're sad and I'm worried that something bad is going to happen." "You're wrong," said Romeo. "Just do as I tell you. Haven't you got a letter from the Friar "

"No."

"It doesn't matter. Go and get the horses. I'll see you later."

—Taken from Romeo and Juliet

40. According to Paragraph 1, how does Romeo feel

A. Angry. B. Sad. C. Happy. D. Disappointed.

41. How did Romeo react to Balthasar's news

A. He didn't care about it.

B. He knew what happened already.

C. He couldn't believe it.

D. He was worried that Balthasar was too tired.

42. Which do you think will happen next

A. Romeo will manage to make a lot of money.

B. Romeo is going to Balthasar's wedding.

C. Romeo is going to visit the place where Juliet lived.

D. Romeo is excitedly going on a trip with his friends.

43. Which of the following is the best title for the passage

A. The Bad News. B. Two Happy Friends.

C. The Trip to Home. D. Plans of a Wedding.

China successfully launched the Shenzhou-18 manned spaceship to send three astaurants to Tiangong space station for a six-month task at 8:59 pm on Thursday, April 25, 2024 at Jiuquan Satellite Launch Center.

With the help of a Long March-2F carrier rocket, the spaceship blasted off from the Jiuquan Satellite Launch Center successfully. The Shenzhou-18 crew members are Ye Guangfu （September, 1980）, from Chengdu, Li Cong （October,1989） from Handan and Li Guangsu （July, 1987） from Xuzhou , with Ye who used to be a crew member during the Shenzhou-13 mission from October 2021 to April 2022 , as the task leader. But it is Li Cong and Li Guangsu's first space flight. The main purposes for the task include orbit handover（轨道移交） with Shenzhou 17 crew and carrying out a series of experiments and tasks during their stay of six months

The three Shenzhou-18 spaceship astronauts have entered the country's space station and met with another astronaut group on Friday, starting a new round of in-orbit crew handover The Shenzhou-17 crew opened the hatch（舱门） at 5:04 a. m.

（Beijing Time） and greeted the new arrivals And they took group pictures.

According to the China Manned Space Agency, the six astronauts will live and work together for about 5 days to complete planned tasks and work." The new crew will carry out more than 90 experiments in the fields of basic physics, space science, space life science, space medicine and space technology", said Lin Xiqiang, deputy director of the CMSA, at Wednesday's press conference.

A special task for the Shenzhou-18 astronauts is to create an "fish tank" and raise zebrafish in zero gravity to study how the space environment affects their growth and system balance. The "fish tank" can hold four small fish. But if the experiment succeeds, it will be a significant breakthrough to cultivate vertebrates in China's space program. The next step in our research includes experiments on fruit flies and mice," said Cang Huaixing, a chief researcher for the space station's scientific experiments.

China will also try its best to push the research on foreign astronauts and space tourists in space station flights.

44. What does the underlined phrase "blasted off" in Paragraph 2 mean

A. took off B. broke out C. ran away D. gave up

45. What do they have in common according to the information in

Paragraph 2

A. They are from the same city.

B. They were all born in the 1980s.

C. They are all on their first space adventure.

D. They were born in the same season.

46. When did the six astronauts begin to stay together

A. In April 2022 B. On 24 April, 2024

C. On 25 April,2024 D. On 26 April, 2024

47. What's the best title of the passage

A. Three Chinese astronauts.

B. Ye's second journey into space.

C. Raising zebrafish in zero gravity .

D. China launches Shenzhou-18 manned spaceship successfully.

A group of students and teachers from the U. S recently attended a study tour to Hebei. The students from Muscatine High School are part of a China program that will invite 50,000 American youths to China within five years for exchanges and study. They are the second group from the school. North China's Hebei Province and the U. S. state of Iowa signed their sister-state relationship in 1983. On Sunday, Ann Castle, along with 31 classmates and eight

teachers, took part in a study tour in Hebei from April 19 to 22, 2024. The students from both schools formed one-on-one friendly partnerships.

Ann Castle visited the home of Zhang Xinyi, a senior student at Shijiazhuang Foreign Language School. Before this, Ann Castle kept herself in learning Chinese Wushu, watching traditional Chinese dances in a park, and trying popular Chinese food. In Zhang's bedroom, the two girls found many common topics of interest. Pipa, a traditional Chinese musical instrument particularly attracted Castle's attention. "This instrument has been in China for 2,000 years. It's similar to a guitar but a bit harder to learn," Zhang told her. After Castle expressed her willing to have a try, Zhang helped her put on the pipa fingernails and shared some playing techniques. Soon, the sound of pipa filled the room. They also tasted tea and desserts, looked through family photo albums, and shared stories about their families. Everything looked so beautiful. "They've been very warm-hearted and friendly. It's been an unforgettable experience," said Castle.

Teachers and students from Shijiazhuang Foreign Language School prepared a welcome concert for the Americans filled with Chinese elements. The American students also learned an ancient Chinese poem, practiced ping pong, made dumplings, planted friendship

trees and visited the Great Wall. Colin Millage, a student from America, said having a tree together with his Chinese friend is more than a friendship between them. It is a friendship between the two nations.

"We hoped the students from both countries would have enough opportunity to communicate with and affect each other during the period of just over three days," said Liu Feng, the headteacher from China. According to Scott Castle, the headteacher from America, several meetings were especially held to choose the exchange students "I have great hope for the future with these kids and the kids they've been working with."

48. You can read the passage from the following ways except ____

A. B.

C. D.

49. How. many members from America attended the study tour to Hebei this time

A. 50,000. B. 31. C. 32. D. 40.

50 . What can you know from the underlined sentences in Paragraph 3

A. Ann Castle has interest in Chinese culture and prepared for the study tour.

B. Ann Castle is good at traditional Chinese musical instrument,
