

基于 JavaWeb 的零食商城的设计与实现

摘要

今天人们处在信息时代，衣食住行都通过网络解决，在网上可以买到生活中绝大部分东西，食品也不例外。其中，零食更受年轻人喜爱，零食销售已经成为食品中的中流砥柱，并且占有率逐年上涨。现在是快节奏社会，不论是上班族还是学生族，每天都有很多压力。而零食恰好成为人们的解压“神器”，它不仅可以在匆忙的片刻充饥，还可以给人们减轻烦恼，享受零食的美味。目前高校在校大学生人数逐年增加，大学生也是一个购物群体，他们的购买力也很强，而零食的受众人群，恰恰是青年人。因此设计一个系统化、规范化的在线零食商城，一定能给人们带来更多的便利。

本在线零食商城使用 SSM 框架搭建，结构合理、安全可靠；选用 MySQL 数据库设计数据表格并与系统连接，使用 Eclipse 开发软件进行开发设计，比较全面的完成了对在线零食商城的设计与实现。

关键词： 在线零食商城，JSP，Java

Abstarct

Today, people are in the information age, clothing, food, housing and transportation are solved through the Internet. Most things in life can be bought online, and food is no exception. Among them, snacks are more popular among young people, snack sales have become the mainstay of food, and the share has increased year by year. Now is a fast-paced society, both office workers and students, there is a lot of pressure every day. And snacks just become people's decompression "artifact", it can not only satisfy hunger in a hurry, but also can relieve people's worries and enjoy the delicious snacks. At present, the number of college students is increasing year by year, college students are also a shopping group, their purchasing power is also very strong, and the audience of snacks is exactly young people. Therefore, designing a systematic and standardized online snack mall will certainly bring more convenience to people.

This online snack mall uses SSM framework to build, reasonable structure, safe and reliable; select MySQL database to design data table and connect with the system, and use eclipse development software to develop and design, relatively complete the design and implementation of online snack mall.

Keywords: Online snack mall, JSP, Java
