

Everlasting Solar Battery

The first integrated Solar Chip

Dr. Shani Keysar – Co-Founder, CEO & CTO

Rami Friedlander – Co-Founder, VP Business Development & Applications

Need alternatives to toxic batteries!

Why?

- Major environmental hazard
- Limited lifetime
- Expensive
- Need accessibility
- Need maintenance

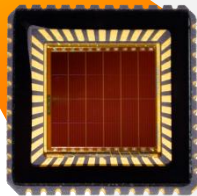

Replacement costs: ~\$1 billion in 2013*

*OnWorld Research

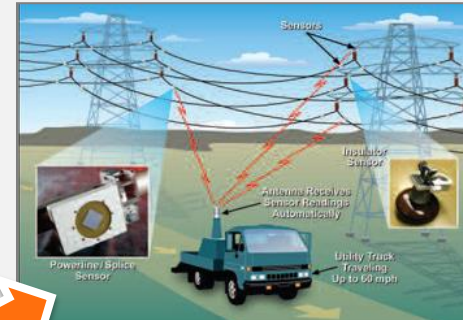

The Need: Continuous Power

SolChip™ Solar Battery provides power forever

Waterproof

Accessibility

Maintenance free

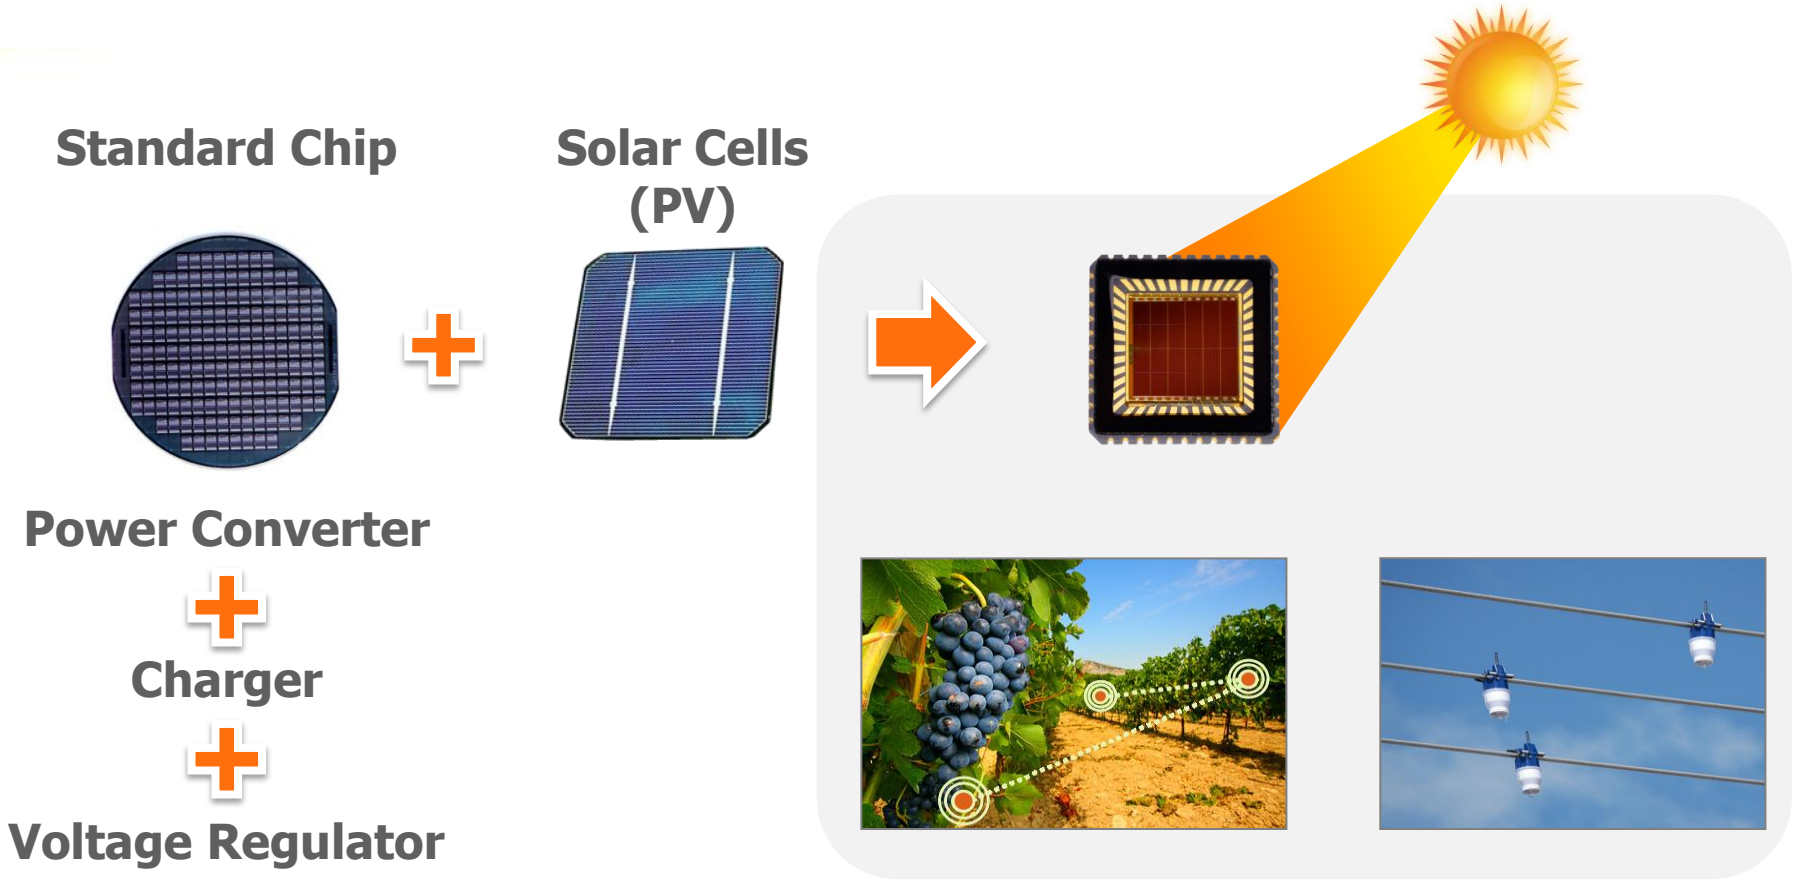

Heavy Duty

Sol Chip *Green* Solution

Everlasting, smart, small, integrated solution

Competitive Advantages

A powerful, cost-saving solution

- Enables and provides long-term autonomous operation of low-power applications
- Reduces environmental hazard
- Decreases design complexity
- Improves overall system efficiency and reliability
- One of a kind 'Plug n Play' solar solution
- Small, smart and integrated solution
