SimHydraulics® Release Notes

© COPYRIGHT 2006–2015 by The MathWorks, Inc.

The software described in this document is furnished under a license agreement. The software may be used or copied only under the terms of the license agreement. No part of this manual may be photocopied or reproduced in any form without prior written consent from The MathWorks, Inc.

FEDERAL ACQUISITION: This provision applies to all acquisitions of the Program and Documentation by, for, or through the federal government of the United States. By accepting delivery of the Program or Documentation, the government hereby agrees that this software or documentation qualifies as commercial computer software or commercial computer software documentation as such terms are used or defined in FAR 12.212, DFARS Part 227.72, and DFARS 252.227-7014. Accordingly, the terms and conditions of this Agreement and only those rights specified in this Agreement, shall pertain to and govern the use, modification, reproduction, release, performance, display, and disclosure of the Program and Documentation by the federal government (or other entity acquiring for or through the federal government) and shall supersede any conflicting contractual terms or conditions. If this License fails to meet the government's needs or is inconsistent in any respect with federal procurement law, the government agrees to return the Program and Documentation, unused, to The MathWorks, Inc.

Trademarks

MATLAB and Simulink are registered trademarks of The MathWorks, Inc. See [rademarks](#) for a list of additional trademarks. Other product or brand names may be trademarks or registered trademarks of their respective holders.

Patents

MathWorks products are protected by one or more U.S. patents. Please see [atents](#) for more information.

R2015a

Variable-Displacement Hydraulic Machine (External Efficiencies) block	1-2
Valve opening dynamics in directional and pressure control valves	1-2
Accumulator blocks with improved hard stops	1-3
New examples	1-3

R2014b

Flow Divider-Combiner block	2-2
Variable Orifice Between Round Holes block	2-2

R2014a

Removal of laminar-turbulent zero-crossings in flow rate equations	3-2
Improvement of mass conservation for cylinders with fluid compressibility	3-2

Gate Valve equations change	3-2
---------------------------------------	-----

R2013b

Cylinder Cushion block	4-2
Pressure-Compensated 3-Way Flow Control Valve block . . .	4-2
Pressure Reducing 3-Way Valve block	4-2
Nominal fluid density parameter for pump and motor blocks	4-2

R2013a

Flow Divider block	5-2
Fixed Orifice with Fluid Inertia block	5-2
Double-Acting Servo Cylinder block	5-2
Partially Filled Vertical Pipe LP block	5-2
Spool Orifice Hydraulic Force block that now supports round hole orifices	5-3
Improved conservation of mass for cylinders with fluid compressibility	5-3
New examples	5-3

R2012b

Journal Bearing Pressure-Fed block	6-2
Fixed Orifice Empirical block	6-2
Fixed-Displacement Motor (External Efficiencies) block ...	6-2
Pneumo-Hydraulic Actuator block	6-2
Counterbalance Valve and Hydraulically Operated Remote Control Valve blocks	6-3
New examples	6-3

R2012a

Bug Fixes

R2011b

New Gate Valve Block	8-2
Swash Plate Block Enhancement	8-2
Segmented Pipe Block Enhancement	8-2

R2011a

New Swash Plate Block	9-2
New Porting Plate Variable Orifice Block	9-2
New Angle Sensor Block	9-2
Changes to SimHydraulics Demos	9-2

R2010b

New Jet Pump Block	10-2
Hydraulic Pipeline Block Enhancement	10-2
Changes to SimHydraulics Demos	10-2

R2010a

Simplified Blocks for Real-Time Simulation	11-2
Low-Pressure Blocks with Variable Elevations	11-2
Cartridge Valve Modeling Blocks	11-2
Lubrication System Modeling Blocks	11-3
Centrifugal Pump Enhancement	11-3
Initial Piston Position in the Single-Acting Hydraulic Cylinder Block	11-3

Changes to SimHydraulics Demos	11-4
---	-------------

R2009b

Additional 4-Way and 6-Way Directional Valve Configurations	12-2
Additional Low-Pressure Blocks	12-2
New Ball Valve with Conical Seat Block	12-2

R2009a

New Low-Pressure Blocks Library	13-2
Changes to SimHydraulics Demos	13-2

R2008b

Explicit Solvers Now Available for SimHydraulics Models	14-2
New Variable-Displacement Hydraulic Machine Block	14-2
Improved Usability of the 4-Way Directional Valve Block	14-2
Changes to SimHydraulics Demos	14-2

Trimming Now Available for SimHydraulics Models	15-2
New Cartridge Valve Insert and Hydraulic Cartridge Valve Actuator Blocks	15-2
Additional Configurations for the Centrifugal Pump Block	15-2
Additional Fluids Available in the Hydraulic Fluid Block .	15-3

Code Generation Now Available for SimHydraulics Models	16-2
---	------

SimHydraulics Now Requires Simscape	17-2
Block Libraries Moved from SimHydraulics to Simscape ..	17-2
Sharing Models Using the Simscape Editing Modes	17-2
New SimHydraulics Blocks	17-2
Initial Conditions Added for Certain Blocks	17-2
Block Library Links Must Be Resolved	17-3
Changes to SimHydraulics Demos	17-4

Linearization Support	18-2
New Solver Option Allows Starting Transient Analysis from a Steady State	18-2
Extended Functionality for Working with Physical Units .	18-2
New SimHydraulics Blocks	18-3

Product Introduction	19-2
---------------------------------------	-------------

R2015a

Version: 1.16

New Features

Bug Fixes
