Which skills will be essential in the AI era?

Skills for success in the Al-driven future | Research by TalentLMS

Digital skills

TOP-RATED:

- 1. Using AI Tools
- 2. Digital Literacy
- 3. Digital

Enablement.

Digitalskillswillbeimportantinanewwork-placeshapedbyAIandautomation,65%of surveyedHRmanagersthink.And using AI tools

isthetop-

rankeddigitalskill. Thisabilityincludes awidespectrumofusecases, includingnavigationofAI-poweredsystems, familiaritywith AIinterfaces, andusageofgame-changing, generals ingaItoolsisexpectedtounlock tremendouspossibilities in lifting productivity ande ciency, driving innovation, refining the decision-making process, and much more.

Digitalliteracyanddigitalenablement, the first and the second runner-updigitals kill, are intertwined but distinct, each contributing to a di \Box entaspect of digital transformation.

Digital literacyinvolvesmanipulatingcomputerizedinformationanddigitalusetools, platforms, and systems. Digital enablement is about choosing the right technology so that a system, device, platform, or toolserves its purpose, and creating an environment where digital transformation can flour ish. Both will be powerhouse abilities in the AI-

infusedfuture, supportingdigital-firststrategiesandAladoption.

Interpersonal skills

TOP-RATED:

- 1. Active Listening
- 2. Managing People
- 3. Creating Synergies Onlineando line, we'resurrounded by constant chatter, instantreactions, and an endless

streamofwordsandopinions.Buttalkingloudly doesnotmaskthelackofthoughtfulnessand skills.Datafromourresearchreflectthis,asthe keyinterpersonalskillvotedbyHRmanagersis the ability to listen.

Talkingisjustoneaspectofcommunication, andyetitdominatestherelatedconversation. Themoresubtleskilloflisteningoftengetslost intheshulle, despiteitsimportance. Attentivelisteningbuildsbondsofunderstanding betweenpeople, leadingtoanenvironmentof trustandrespect, enrichedwithdiverseviewpoints. Anopenmindandreceptivenessarethe buildingblocksofthisskill, alongwithafocus onunderstandingpeopleandsituationsbefore responding. Organizationsthatare

Therunner-uponthelistofinterpersonal skills is managing people—anevergreenand sought-afterpeopleskill.Creatingharmonious teamenvironmentswithstellarperformance requiresacomplexsetofabilitiesthatwillbein highdemandasAItakeshold.

Movingon, intertwinedwithactivelisteningand managingpeople, thethirdtop-ratedpeople skill is creating synergies. Thisskill, which describes how well people work together, is foundational for synchronized, cohesive, and agile teams. Combined, these three interpersonal skills result in the ability to create a unified vision and common goals, break downsilos, and bring people, teams, and stakeholders on the same page. And that will be a treasured set of competencies in an AI-fueled work place.

65% of HR managers find that interpersonal skills will be important as AI and automation are becoming more prevalent in the work place.

Cognitive

SORIBATED:

- 1. Problem-Solving
- 2. Creativity, Originality and Imagination
- 3. Ability to Learn

Everydisruptionthatdrivesusforwardcreates anewsetofchallengesalongtheway.Artificial intelligenceisnotanexception, and its benefits goside-by-sidewithroadblocks. That may be oneofthereasonswhyproblem-solvingisvoted akeycognitiveskillbysurveyedHRleaders.As fast-evolvingtechnologybringsnewcomplexityandchallengesintotheworkplace, problem design solutionsandsimplify solverswhocan thisoverwhelmingcomplexitywillbehighly prized. Problem-solving involvesbothanalyti- findingawaythroughtheoverwhelmingincalandcreativethinking, with the latter being featuredsecondonthelistofcognitiveskills prioritizedbyHRpros.
