Introduction

Firstly, I want to thank you for purchasing this theme.

This document covers the installation and use of this theme and often reveals answers to common problems and issues - I encourage you to read this document thoroughly if you are experiencing any difficulties. If you have any questions that are beyond the scope of this document, feel free to post them in the dedicated support forum at

<http://www.arrowthemes.com>

To get access to the forums, please send me a quick message with the word 'SUPPORT' via [my profile page](#) and I'll activate your account on the forums.

1.1 Template Overview

Fontaine Joomla Template is a clean business or portfolio Joomla 2.5/3.0 template built on Warp framework, using the latest techniques in HTML5 and CSS3. Fontaine comes packed with widgets and an intuitive admin option panel. The underlying Warp framework gives the theme an immeasurable weight of flexibility and agility, fast loading site using built in compression of files, data URIs and gzip minification. The features at a glance are:

- Joomla 1.7, 2.5 and 3.0 Ready
- Built on Warp framework
- HTML5/CSS3 Technology
- Fully responsive Layout
- Unlimited color possibilities with 3 built-in preset styles
- 50+ module positions
- Responsive design
- K2 Styling
- Image and content slider
- Flexible columns and template widths
- Filterable portfolio
- Cross browser compatible (Chrome, Safari, Opera, Firefox, IE 8-9)
- Custom Form Elements custom UI
- SEO friendly
- And much, much more

Theme Styles and admin options

Fontaine Joomla template comes with different style variations to give you flexibility and variety. In addition to these styles, you can tweak several other style settings like colors and fonts right from the admin panel. Combining the different style options allows you to create your own unique theme design.

Theme profiles

Fontaine Joomla theme comes with some nice theme profiles built with different styles, colors and fonts, you can choose from in the theme administration. You can create your own profiles and even assign them to different menu items.

Theme Layouts

Fontaine Joomla theme comes with a standard module layout. The module positions in blue borders allow to choose a module layout which defines the module alignment and proportions: equal, double, uneven or stack.

1.2 Getting Started

Once you upload the package to your FTP, extract the files to a folder. The package includes the following files/folders:

fontaine_j25.zip – the template file that you can use to install into your existing or clean Joomla 2.5 installation.

fontaine_j3.zip – the template file that you can use to install into your existing or clean Joomla 3.0 installation.

fontaine_j25_quickstart.zip – a quick-launch Joomla 2.5 installation package that contains all the sample data, placeholder images and extensions to replicate the live demo.

fontaine_j3_quickstart.zip – a quick-launch Joomla 3.0 installation package that contains all the sample data, placeholder images and extensions to replicate the live demo.

fontaine_j25_extensions.zip – includes download links of components, plug-ins and modules that have been used in the Fontaine Joomla 2.5 quick-start package. You need to unzip it first to use the bundled components, plug-ins, languages and modules. The extensions included are:

- *com_zoo (lite)* – a flexible and powerful CCK component and content application builder to manage your content
- *com_kunena* – a popular forum component from Kunena team
- *rok_candy* – a pretty handy component to include shortcodes into the Joomla editor
- *roksprocket* – a combo of extensions from Rockettheme that consists of lists, features, headlines and tabs
- *widgetkit (lite)* – a next-generation toolkit that bundles nice widgets and plug-ins
- *K2* - a powerful and robust CCK component and content application builder to manage your content
- *plugin_googlemap* – a plug-in that adds google maps api to your site

fontaine_j3_extensions.zip – includes download links of components, plug-ins and modules that have been used in the Fontaine Joomla 3.0 quick-start package. You need to unzip it first to use the bundled components, plug-ins, languages and modules. The extensions included are:
