A．He can only see things up close.

B．He gets glasses for the woman.

C．He doesn’t like his old glasses.

5．What are the speakers going to do next?

A．Stay at home.　　B．Play with snow.　　C．Play badminton.

听下面一段较长对话，回答以下小题。

6．Why does the woman want to replace the sofa?

A．It is uncomfortable.

B．It is really old.

C．It doesn’t match the table.

7．What do the speakers agree to do?

A．Change the table.

B．Buy a reading lamp.

C．Move a lamp onto the table.

听下面一段较长对话，回答以下小题。

8．What did the man use last weekend?

A．A shared bike.　　B．A shared charger　　C．A shared umbrella.

9．What is the woman going to talk about next?

A．The proper ways to use the sharing product.

B．Her attitude towards the sharing economy.

C．The advantages of the sharing economy.

听下面一段较长对话，回答以下小题。

10．What has the man found?

A．An old door.　　B．A secret dinner.　　C．An interesting wall.

11．What's the probable relationship between the two speakers?

A．Boss and secretary.

B．Father and daughter.

C．Husband and wife.

12．Where are the speakers?

A．In a shop.　　B．In a house.　　C．In a castle.

听下面一段较长对话，回答以下小题。

13．What is the man doing?

A．Eating a meal.　　B．Cooking a meal.　　C．Having an interview.

14．How long has the man been cooking?

A．Only recently.

B．Since he was a kid.

C．Since he was twenty years old.

15．Why does the man mention rice and noodles?

A．To give an example.

B．To name his favorite food.

C．To show his best cooking.

16．What is the most important for cooking according to the man?

A．Rich flavors.

B．Freshness of food.

C．Different styles of cooking.

听下面一段独白，回答以下小题。

17．What is Cathy’s nationality?

A．Chinese.　　B．German.　　C．American.

18．When will they start making dumplings?

A．At 4 p. m.　　B．At 6 p. m.　　C．At 8 p. m.

19．How will Cathy come to the speaker’s house probably?

A．By car.　　B．By bus.　　C．By taxi.

20．What does the speaker think Cathy may worry about?

A．Going back too early.

B．Staying there too long.

C．Having difficulty watching TV shows.

二、阅读理解

London Cycle Hire Scheme

Renting a bike is not only one of the most pleasant ways to travel around the back streets of London; it’s also one of the cheapest. Approximately 12,000 bikes are available to rent 24 hours a day, all year round. You can hire a bike from any of the 800 docking stations and return it anywhere on the network. The three-speed bikes are pretty strong. They come with a bell, a front basket and a chain guard. The front and back lights come on when you start pedaling and the seat height is easily adjustable.

How much does It cost?

Unfortunately, the free under-30-minute-ride deal was canceled in September 2022.

*£1.65 per 30-minutes

How to hire a bike?

There are two ways to hire a bike—at a docking station terminal or via an app (the easier way)

At a docking station

*Touch the screen and insert a credit or debit card. The machine will print a receipt with a release code.

*Enter the release code. Wait until the green light lashes and pull out your bike and go.

Via the Santander cycle hire app

Smartphone users can now use an ios or android app to hire and pay for a bike. However, using the app does not reserve a bike. You still only have 10 minutes to use the release code, so make sure you're near the docking station when you use it.

Please note: You have to be 18 or over to pay for a bike. You also need a credit or debit card-cash is not accepted.

21．How much does it cost to rent a bike for 3 hours?

A．£9.9.　　B．£1.65.　　C．£3.3　　D．£6.6

22．What should you pay attention to when renting a bike via an app?

A．Making an advance booking.　　B．Carrying enough money.

C．Keeping the time limit in mind.　　D．Offering your personal details.

23．What is the main topic of the text?

A．A bike docking station.　　B．Service for renting bikes.

C．Having a trip in London.　　D．An app used for hiring bikes.

Last Friday, a robot called EveR6 led an orchestra (管弦乐队) in a performance of Korean music at the National Theater of Korea. EveR 6 is about as tall as a person, and has a human-like face that can show emotions. Its joints (关节) allow it to move its arms quickly and smoothly in many different directions.

But EveR 6 doesn't think on its own like some advanced Artificial Intelligence programs.

Instead, it has a limited group of movements that it has been trained to perform. To make these movements as natural as possible, EveR 6's movements are based on those captured from real human conductors.

In Friday's performance, the National Orchestra of Korea presented a concert titled "Absence". The concert included five different pieces of music. Two were conducted by EveR 6, and two were conducted by Soo-Yeoul Choi, who leads the Busan Philharmonic Orchestra. Both conductors worked together on the final piece.

Mr. Choi was impressed with the way EveR 6 moved. "The robot was able to present such detailed moves much better than I had imagined," he said.

But Mr. Choi added that the robot's biggest weakness is that it can't hear. "Some people think that conducting is just a combination of hand waving and keeping the beat," said Mr. Choi. "But a good conductor needs to listen to the orchestra, so that he or she can correct and encourage the orchestra as it plays."

Mr. Choi and EveR 6 both conducted a piece of music called "Sense". Instead of musical notes, EveR 6 had instructions for how to play the piece. The conductors and musicians had to work together to create the music. Mr. Choi communicated with the musicians while EveR 6 kept the beat. Mr. Choi said that once EveR 6 started, the musicians had "no choice but to follow its beats".

Mr. Choi doesn't think robots are likely to replace human conductors. But he believes robots could be helpful in situations like practice sessions where the same thing needs to be repeated many times.

24．What do we know about EveR 6 from the text?

A．It is an experienced conductor.　　B．It has a lifelike appearance.

C．It is able to listen to music.　　D．It is much shorter than a person.

25．What does the underlined word "captured"in paragraph 2 mean?

A．Stolen.　　B．Stopped.　　C．Recorded.　　D．Hidden.

26．What advantage does a human conductor have over EveR 6?

A．Waving hands.　　B．Keeping the beat.

C．Having instructions.　　D．Communicating with musicians.

27．What is the text mainly about?

A．A robot conducting an orchestra.　　B．An orchestra having performed in Korea.

C．Modern music combined with technology.　　D．Two conductors getting worldwide recognition.

While temperatures continue to climb, visitors are still coming to see Death Valley National Park on the California-Nevada border. The park is known as the hottest place on Earth. This past weekend, the temperatures climbed to 53.33℃. Most visitors at this time of year make it only a short distance to any area in the park before returning to the cool air in their vehicles.

Early information from the park service shows that across the nation's 424 national parks, at least four people have died this year from heat-related causes. That includes a 65-year-old man from San Diego who was found dead at Death Valley earlier this month.

Death Valley National Park suggests visitors be careful and not have expectations of rescue. While park rangers (护林员) drive on park roads and can aid tourists in need, it is unsure that lost visitors will get help in time.

Physical activity can make the heat feel even worse and leave people exhausted. Alessia Dempster, who was visiting from Edinburgh, Scotland, said, "It's very hot especially when there's a gentle wind. You would think maybe that would give you some slight relief from the heat, but it just really does feel like an air blow dryer just going back in your face."

Death Valley is a narrow area that is below sea level and surrounded by high mountains, the park service's website says. The dry air and small plant coverage let sunlight heat up the park surface. The heat then becomes trapped in the valley.

Still, several areas in Death Valley continue to draw tourists. Badwater Basin, made up of salt flats, is considered the lowest point in all of North America. The 183-meter Ubehebe Crater dates back over 2,000 years. And Zabriskie Point is a great sunrise viewing spot.

Josh Miller, a visitor from Indianapolis who has been to 20 national parks so far, shared that feeling. "It's hot, but the scenery is awesome," he said.

28．What do most visitors do in Death Valley?

A．Cool themselves in time.　　B．Do lots of physical exercises.

C．Stay away from park rangers.　　D．Carry dryers with themselves.

29．Why does the author mention the 65-year-old man in paragraph 2?

A．To encourage the elderly to travel more.

B．To express admiration for mountain climbers.

C．To advise people to tour Death Valley more often.

D．To show the danger of traveling in Death Valley.

30．What does paragraph 5 mainly tell us about Death Valley?

A．Its covering area.　　B．Its attractive spots.

C．The reason why it is so hot.　　D．The service of its park's website.

31．What can be inferred about Death Valley from the last two paragraphs?

A．It has a short history.　　B．It is worth visiting.

C．It draws fewer and fewer tourists.　　D．It is unsuitable for viewing sunrise.

Indoor food growing operations are seeing both successes and failures in the United States. Some companies in the food industry are investing (投资) even as competitors fail.

California-based Plenty Unlimited this summer began working on $300 million indoor plants, while Kroger announced that it would be increasing its availability of vertically (垂直地) farmed produce. Meanwhile, two indoor farming companies that got strong backing—New Jersey's AeroFarms and Kentucky's AppHarvest—filed for financial failure and reorganization. And a five-year-old company in Detroit, Planted Detroit, shut its doors this summer.

The industry changes do not worry Jacob Portillo, a grower with Eden Green Technology, an indoor farming company. "The fact that other people are failing and other people are succeeding is going to happen in any industry you go to," he said.

Indoor farming refers to growing crops indoors, which experts sometimes call "controlled environment agriculture". There are different methods. One method called vertical farming involves putting produce from floor to ceiling, often under artificial lights and with the plants growing in nutrient-enriched water. Other growers are trying very large greenhouses, indoor beds of soil in big buildings and using special robots for parts of the farming process.

Supporters say growing indoors uses less water and land and permits food to be grown closer to consumers, saving on transport. Indoor growing is also a way to protect crops from increasingly extreme weather caused by climate change.

But critics question the sustainability (可持续性) of operations that can require a lot of

energy for artificial lights. And they say paying for that light can make profitability impossible. Curt Covington of AgAmerica Lending, a private investment company centered on agriculture, is not convinced that indoor farming operations can work—except in special cases. Given the high cost of indoor operations, Covington said, "It's just hard to be very profitable."

32．What is Jacob Portillo's attitude to the indoor food growing industry?

A．Positive.　　B．Worried.　　C．Unclear.　　D．Doubtful.

33．What can we learn about indoor farming?

A．It takes a lot of manpower to take care of plants.

B．It means growing plants in water instead of soil.

C．It protects crops from increasingly extreme weather.

D．It is different from controlled environment agriculture.

34．Why did Curt Covington question indoor farming operations?

A．They produce little food.　　B．They carry great cost.

C．They need sunlight.　　D．They lack investors.

35．What is the best title for the text?

A．What Types of Food Can Be Grown Indoors?

B．How Can You Grow Food Indoors Without Soil?

C．Indoor Farming Companies Take Agriculture Indoors

D．Indoor Food Growing Operations Face an Uncertain Future

With the semester approaching its end, sophomores (高二学生) are faced with three significant exams. These include the information technology high school academic proficiency test, the general high school academic proficiency qualification test, and the final joint examination of key high schools in Yancheng. __36__.

For the review content arrangement, it is essential that students make a detailed plan. What comes first is the information technology exam. __37__. It is recommended that they spend sufficient time on operating different software and understanding their functions. For the academic proficiency qualification test, a comprehensive review of all subjects is necessary, especially those fundamental concepts and formulas (公式) that act as the building blocks of knowledge. As for the joint examination, it is advisable that they summarize the knowledge learned during the semester

and practice with mock tests.

Psychological adjustment is equally important. It is necessary that students keep a calm and positive attitude. __38__. Instead, they can take short breaks during study, which can help them to regain energy. Deep breathing exercises or listening to soft music can be effective stress relievers.

In terms of time planning, students need to allocate their time reasonably. __39__. For example, in the early morning, when the mind is as fresh as a daisy, they can focus on memorizing theoretical knowledge. In the afternoon, they can engage in exercises and mock tests to strengthen their understanding and application abilities.

In conclusion, only by carefully arranging the review content, effectively adjusting the psychological state, and wisely planning the time can students be well-prepared to face these three important exams and achieve satisfactory results. __40__.

A．Through such efforts they can hope to move forward on their academic journey

B．They need to make a schedule showing the particular time for each subject and exam

C．The methods of review and preparation are far from being crucial

D．All these exams are like crucial battlegrounds for their academic progress

E．What requires their focus is the practical skills and theoretical knowledge

F．By no means should they be overwhelmed by stress and anxiety

G．A large amount of time should be devoted to key subjects

三、完形填空

No one expected Jamie MoCrazy to live after her fall. The chances of __41__ were slim when her brain started bleeding in eight spots. Family and friends __42__, hoping for a miracle (奇迹) but fearing the worst.

She had been __43__ in freestyle skiing's World Tour Finals in Canada when disaster struck. Having successfully completed her __44__ run, ranking fourth in the standings, she increased the difficulty for her second and final run. However, her __45__ landed first, lying there unconscious (无意识的).

Ten days after the __46__, at the age of 22, she opened her eyes. Although she only __47__

them for a few seconds, they were enough to add a little ___48___ to the darkest days. Six weeks later, she could recognize her parents.

The ___49___ was slow, often painful. There were physical and mental problems to overcome. The ___50___ challenges she faced were the easiest while her feelings were greatly affected. It took her five years to ___51___ recover from the accident.

"That does not mean my___52___ has to be worse. I viewed it as climbing a mountain. The views on the top might be even more ___53___," MoCrazy said.

Her life goal now is to ___54___ others who have suffered traumatic (创伤性的) brain injuries, ___55___ a non-profit organization MoCrazy Strong with her mother for the purpose of giving back.

41．A．winning	B．survival	C．profit	D．training
42．A．disagreed	B．smiled	C．waited	D．fell
43．A．competing	B．teaching	C．swimming	D．walking
44．A．first	B．second	C．third	D．fourth
45．A．arms	B．head	C．feet	D．back
46．A．order	B．fight	C．work	D．accident
47．A．opened	B．closed	C．touched	D．narrowed
48．A．water	B．style	C．light	D．gratitude
49．A．service	B．speed	C．trip	D．recovery
50．A．academic	B．physical	C．mental	D．similar
51．A．emotionally	B．potentially	C．logically	D．instantly
52．A．life	B．family	C．heart	D．income
53．A．awful	B．detailed	C．distant	D．amazing
54．A．defeat	B．help	C．employ	D．bother
55．A．breaking down	B．figuring out	C．searching for	D．setting up

四、语法填空

阅读下面短文，在空白处填入 1 个适当的单词或括号内单词的正确形式。

Jiangsu Taizhou High School, ___56___ unique and outstanding educational institution

worthy of note, ___57___ (leave) a profound mark on the educational landscape of the region in recent years.

The campus of the school is truly a splendid place. It sprawls over a large area ___58___ (dot) with green lawns and towering trees. Throughout the year, a rich variety of flowers burst into bloom, adding a touch of vivid color. The teaching buildings are spacious and well-equipped. Classrooms are bright and spotless, ___59___ (provide) a comfortable environment for students to study. Apart from these, the school has advanced laboratories, which enable us to conduct interesting ___60___ (science) experiments.

Teachers are the very core of the school, who are highly professional and passionate about teaching. By employing diverse teaching method, they make complex knowledge easy ___61___ (understand). Their attention is not only fixed on students' academic achievements ___62___ on their personal development.

There are ___63___ (number) activities for students in this school. For instance, the annual sports meeting is filled with thrills, ___64___ students can show their athletic abilities. Cultural festivals also offer a platform for them to display their talents in art, music, and so on. It comes ___65___ no surprise that these activities can enrich their school life and help them develop teamwork. Altogether, Taizhou High School is a place that nurtures students' dreams and help them move forward.

五、书信写作

66．假定你是李华，你的朋友 Mark 将在元旦期间来你家做客，特发邮件询问你的假期的一些活动安排，请你回复一封邮件。

内容包括：1. 欢迎来访； 2. 你的元旦假期活动安排。

注意： 1. 写作词数应为 80 个左右; 2. 可以适当增加细节，以使行文连贯。

六、书面表达

67．阅读下面材料，根据其内容和所给段落开头语续写两段，使之构成一篇完整的短文。

My friend invited me to a trapeze (高空秋千) class. I was doubtful because of a lack of courage and a short of self-confidence, but her enthusiasm and assurances of strict safety rules won me over.

I had been fearful of heights since elementary school and avoiding my fear of heights became second nature. But here I was, at age twenty-six, facing my fear of heights in a rather extreme way. I had come around to the idea of trying trapeze. I figured it wasn't much different from swinging (舞动) on the monkey bars as a kid. One difficulty I didn't expect was the ladder (梯子). In order to reach the trapeze, I had to climb up a twenty-two-foot ladder.

I could hear one of my classmates expressing her impatience with my slow climb up the ladder. "If she's afraid of heights, why did she sign up for a trapeze class?" However, my friend was at the top of the ladder, trying to encourage me. Besides, his distraction techniques helped to take my mind off my dangerous task. I found a rhythm(节奏) and kept going. With a slow and steady pace, I made it to the top. The cheers from my classmates rang out below.

An instructor told me to step to the edge of the platform. He reminded me of the safety rules, including the net below that would catch me at the bottom. He also asked me to listen to the directions while in the air, so I could perform a trick.

As the instructor counted down, I took a deep breath and pushed off the platform, swinging back and forth. At that moment, I lost awareness of time and space. Fortunately, the instructor's voice came over the loudspeaker, giving me step-by-step instructions for performing a trick. Instead of doubting my inability to perform the trick, I took his directions one step at a time.

注意：1. 续写词数应为 150 个左右;

2. 请按如下格式在答题卡的相应位置作答。

During my flight on the trapeze, my fear didn't completely leave me.

This experience opened up a new way of seeing myself and approaching other challenges.
